Imagine the future where industries work together committed to preserve resources, reduce waste and create high value products with greater longevity...

In DME we believe in building the Sustainable Future through Innovation. We work with our partners daily to prove that Less is More: reducing energy consumption, bringing down material waste and optimizing the manufacturing process while increasing productivity and output.

The Future is Ours, the future is DME

No matter what solutions you need from processing equipment to tooling to industrial supplies and aftermarket parts, we deliver the technology you need to optimize the total life cycle of your products. With the industry broadest catalogue, DME provides a single source for virtually any tooling application.

DME's global product platforms provide reliability to our multinational customers, who know they're getting the same high-quality DME solutions worldwide.

DME stands for:

- Highest quality of operational excellence
- Leading product development and testing options
- State-of-the-art European manufacturing facilities
- All major mould base standards available in over 25 steel grades
- Certified European steel
- Special machining in high precision as per customer specifications
- Widest off-shelf range of standard mould components in the industry
- Extended range of workshop equipment and industrial supplies
- Innovative digital platform: eSTORE and 3D libraries

DME

12 x 400 ml Spray

DME ensures fast and reliable deliveries and carries over 35,000 stock products for all your moulding needs with a large warehouse in central Europe. Modern equipment and the workflow for fast dispatching ensure the swift and flawless processing.

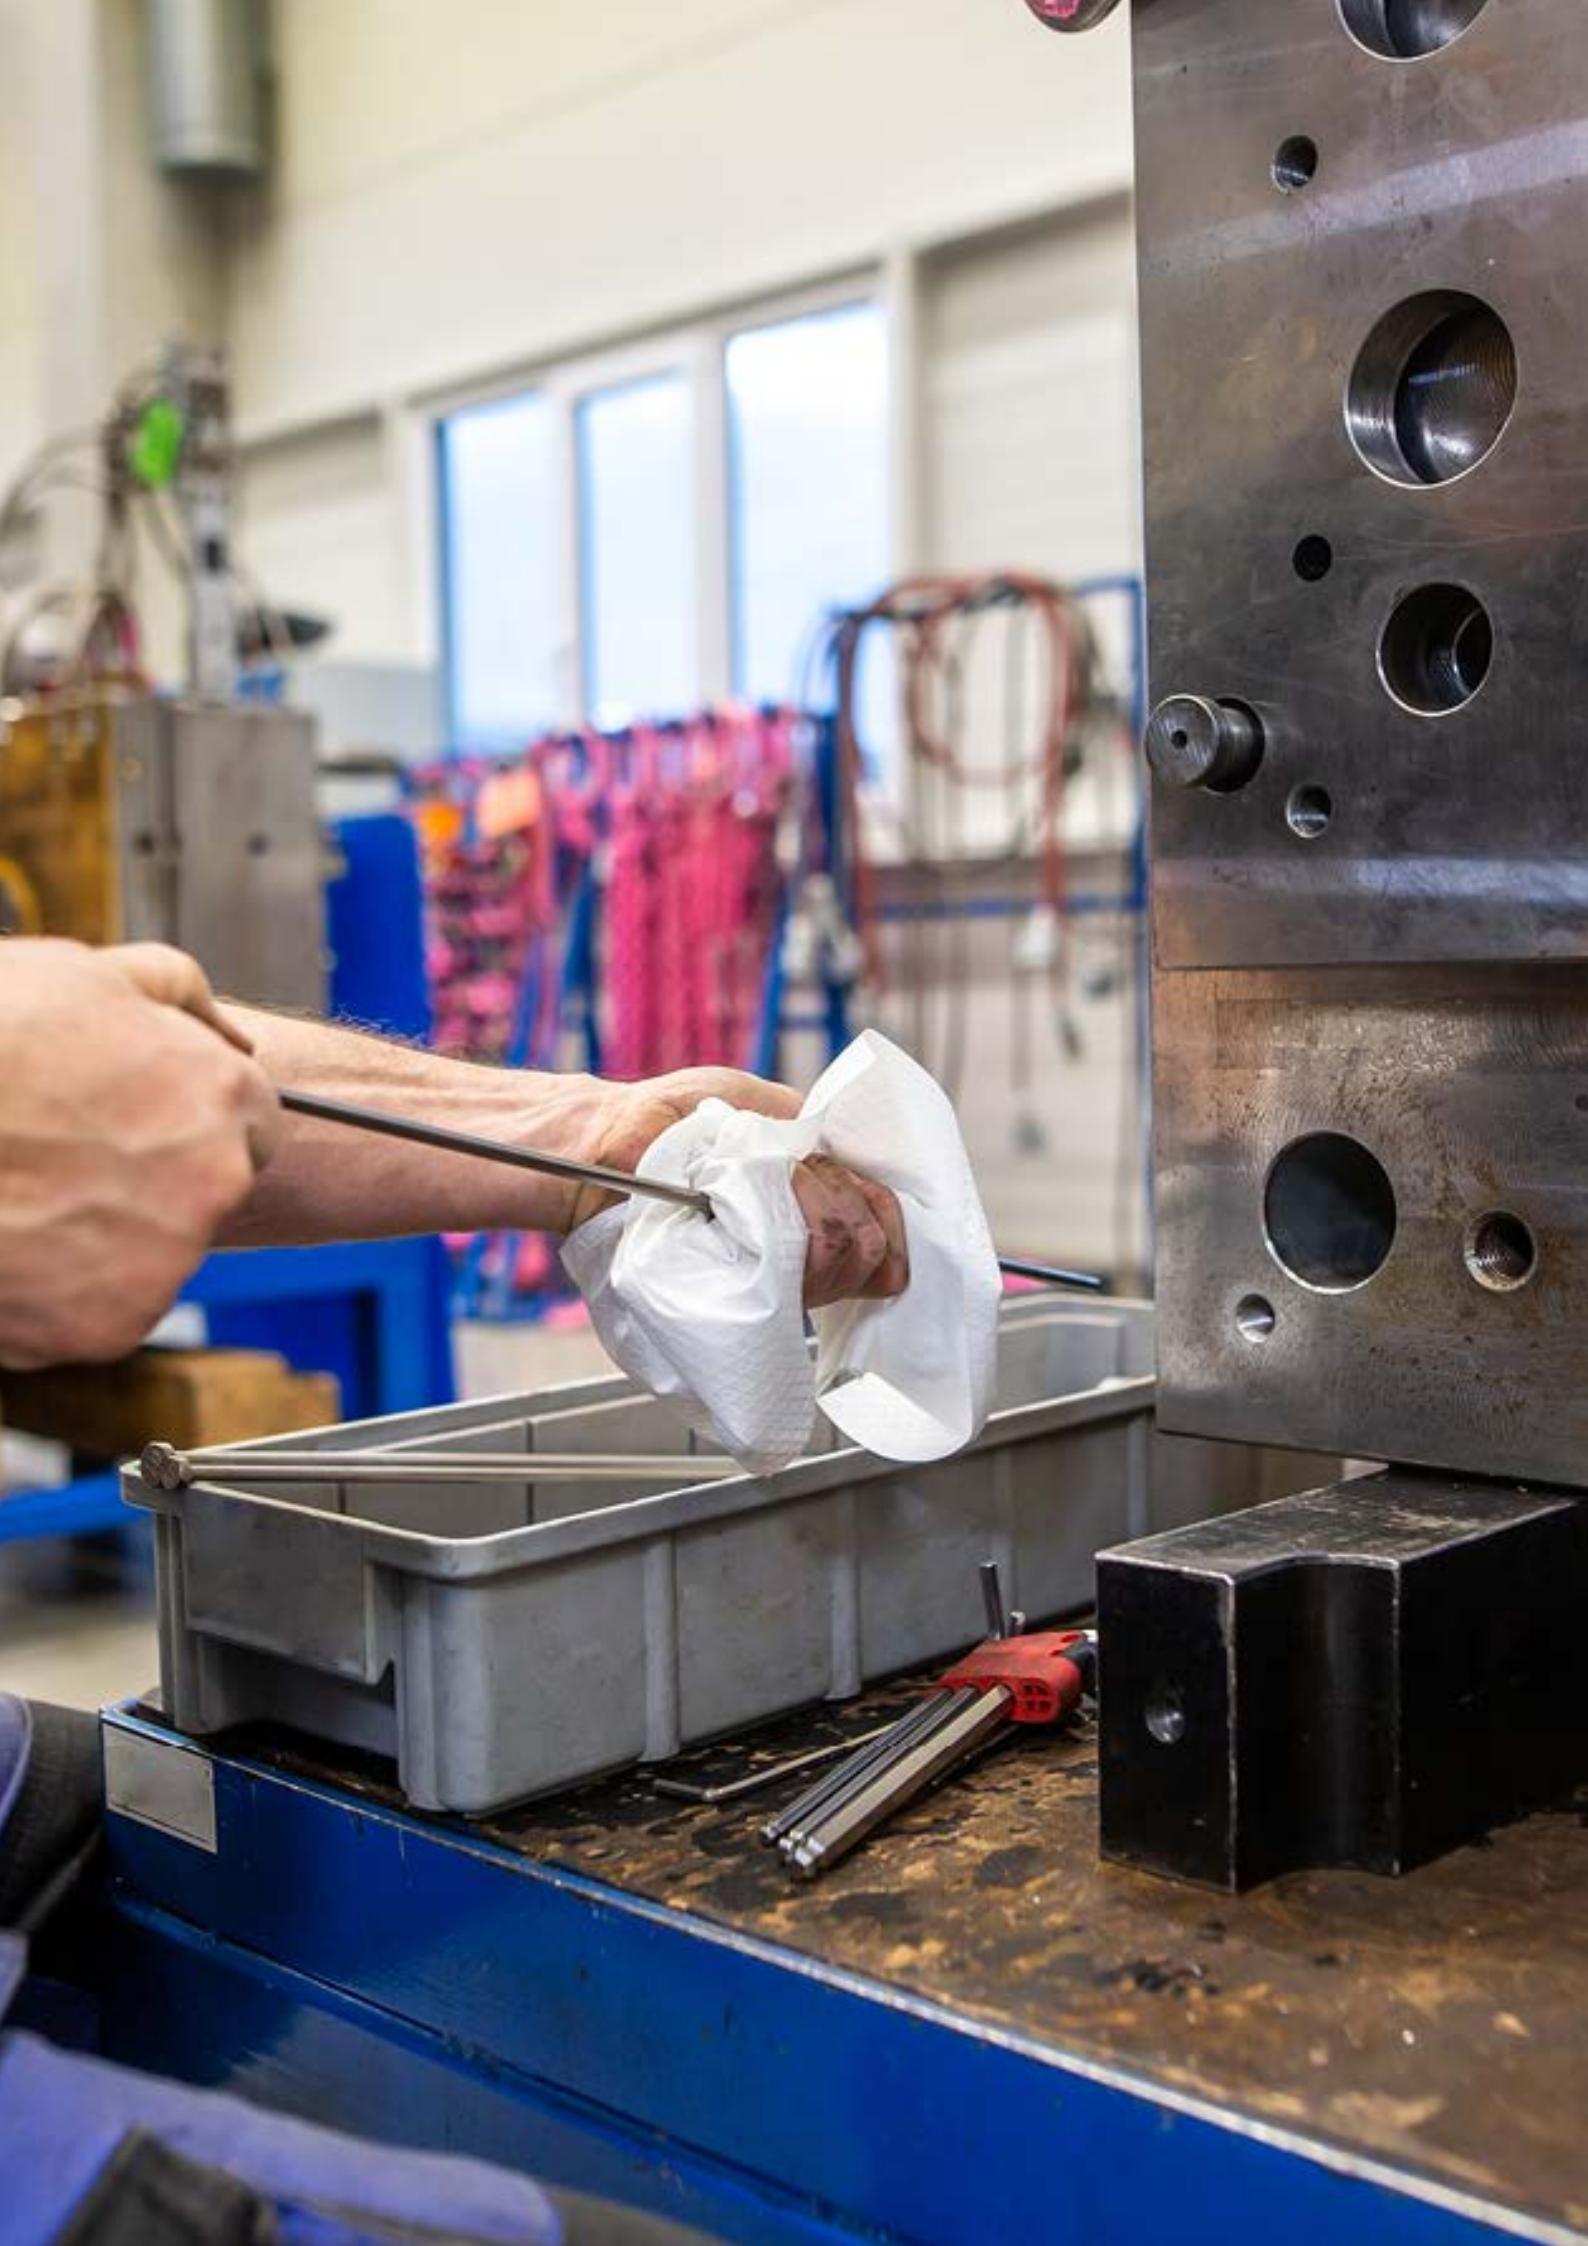

DME manufacturing facilities are ISO 9001 certified to provide consistent, dependable quality.

With eight decades of making mould makers, moulders and designers more efficient and more productive, we've become an essential resource to the industry.

CCA-M7000

AFTER

MICROCONTROLLING UNIT FOR AUTOMATIC RINSING

TOUCHSCREEN DISPLAY SHOWING OPERATION VALUES OF THE CLEANCARE OPTISYSTEMS 4800 / 7000

CleanCare is the result of decades of experience in industry and trade, reliable and easy-to-use device for automated cleaning of water-bearing systems.

CleanCare removes rust, limescale and other deposits from water systems. The cleaning medium is powered by compressed air only. Benefit from a huge increase in performance, comprehensive cost reduction and first-class service.

Benefits:

- **COMPREHENSIVE CLEANING** - Rust, lime and other deposits are removed from your water-bearing systems, tools and machines.
- **QUALITY AND PERFORMANCE IMPROVEMENT** - After cleaning, you will notice a significant difference in the quality, efficiency and performance of your systems.
- **WEAR AND TEAR AND REPAIR MINIMIZATION** - Reduced wear on your machines, less maintenance, minimized production downtime and lower repair costs.
- **ENERGY COST SAVINGS** - You will achieve a significantly lower energy resource consumption with the CleanCare.

Fields of application:

- INJECTION MOULDING MACHINES
- INJECTION MOULDING TOOLS
- TEMPERATURE CONTROL UNITS
- COOLING CIRCUITS

Basic features:

- single rinse of operating cycles
- leakage test of operating cycles
- single operation with compressed air
- low-maintenance and robust membrane pump
- large smooth-running wheels
- large tanks for rinsing / preserving
- extendable hose for flow and return (2 x 5 m)

Technology features:

- USB port for saving the cleaning protocol
- simple to perform software updates
- backlit colour touch display
- direct pH measurement of the rinse water cycle
- direct flow measurement of the rinse water cycle
- display of process data on the touch display
- saves relevant protocol data on a USB stick
- integrated rechargeable batteries for
- mains-independent operation

Size & Weight:

Size: 528 (width) x 1190 (height) x 790 (depth) mm

Weight: approx. 67 kg (empty)

Performance characteristics:

Max. flow rate: 28 l / min (M7000S with 80l/min)

Feed pressure: 6-8 bar

Max. drive pressure: 8 bar (M7000 and M7000S, can be upgraded to 10 bar)

Cleaning tank capacity: approx. 115 l

Preservation tank capacity: approx. 18 l

Filter mesh size: 60 - 350 µm

Electrical connection:

Power supply: 230V/ 50Hz

Power consumption: max. 50 VA

CLEANCARE UNIVERSAL

CCA-UNIVERSAL

MIKROCONTROLLER UNIT FOR AUTOMATIC FILTRATION AND DOSAGE

4,3" TOUCH DISPLAY FOR DISPLAYING THE OPERATING VALUES

Clean Care Universal is an easy-to-use, stationary or mobile cleaning device for **filtering, processing, suction and monitoring liquid media** in open and closed circuits.

Benefits:

- COST SAVINGS - Reduction of waste volumes, automatic maintaining the quality of the liquid
- TIME SAVINGS - Automatic dosing of additives depending on the quality of the fluid
- ENERGY SAVINGS - Clean cooling medium reduces the energy costs and cycletimes
- IMPROVEMENT OF THE CLEANING/LUBRICATION/COOLING QUALITY - Improvement of the quality through continuous filtration and stabilization of the pH-value

Fields of application:

- INJECTION MOULDING MACHINES
- TEMPERATURE CONTROL UNITS
- COOLING CIRCUITS
- CLEANING BATHS
- CNC-MACHINING CENTERS

Basic features:

Superfiltration and maintaining the quality of cooling water, cooling lubricant and cleaning baths

- 3-stage filtration
- 3x dosage pump
- Automatic pump control
- Dosage correlating to target pH-value, target conductivity or target capacity
- Process recording on a USB-flash drive
- 4,3" touch display for displaying the operating values and controlling the device

Performance features:

- Flow rate (reducible): about 3000 l/h at 1 bar
- Max feed pressure: 4 bar
- Max. inlet pressure: 1 bar

Dimensions & weight:

- Dimensions (H/W/T): 121 cm / 73 cm / 100 cm
- Weight: 130 kg (empty)

Supply connections:

- Power supply: 230 V / 50 Hz
- Power consumption: max. 50 VA
- Pneumatic drive pressure: min. 2 bar
- Air consumption: 200 l/min. at 4 bar

Available accessories:

- PH stabilizer, germ reducing agents, corrosion inhibitors, cleaning enhancers
- Canister connections with empty status detection
- Various suction lances / brush / floor cleaning pig / skimmer
- Filter inserts with a mesh size of 1 μ up to 1000 μ and a filter medium degreasing agent

FLOWMETERS

FLOWMETERS

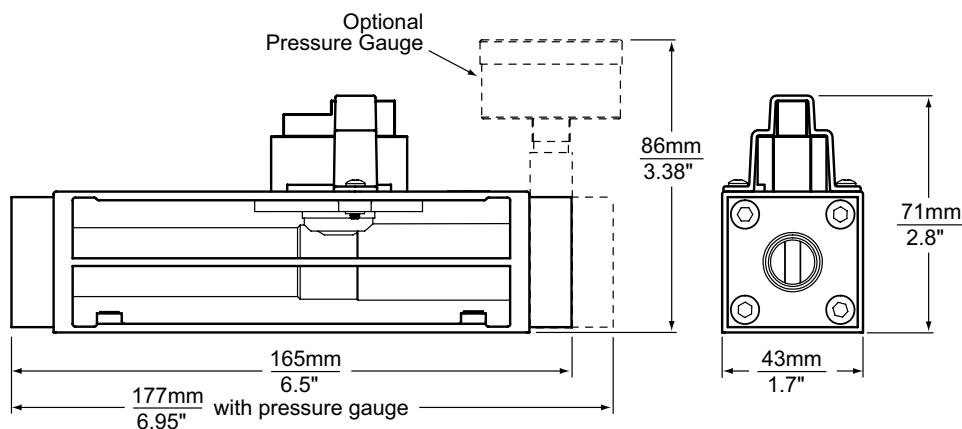

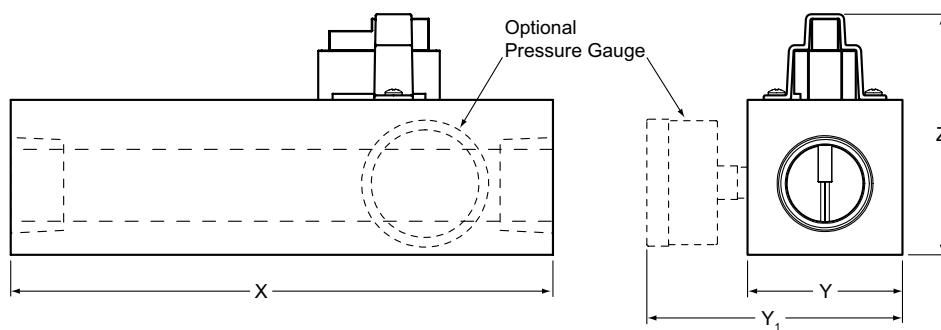

BASE FLOWMETERS

VM

**Benefits**

- Non display flowmeter, sending a voltage signal to data acquisition system or Bluetooth interface
- No moving parts for reliable operation based on Vortex sensor technology
- Flow and Temperature Sensors in one unit for compact installation
- Quick temperature response from direct media contact
- Economical and versatile construction with corrosion-resistant materials

FLOWMETERS

FLOWMETERS WITH LOCAL OR REMOTE INTERFACE

VM

Features and benefits

- Flowmeter with user interface, showing flow rate, temperature, FCI, indication of TF turbulent flow, Reynolds number and totalizer of volume
- Special FCI Flow Characteristic Indicator system to optimize water usage sending a voltage signal to data acquisition system
- Is suitable to use in injection mould cooling and die casting cooling
- R version stands for remote (provided with 2,9m cable) and L stands for Local (display on the flowmeter case)

Specifications:

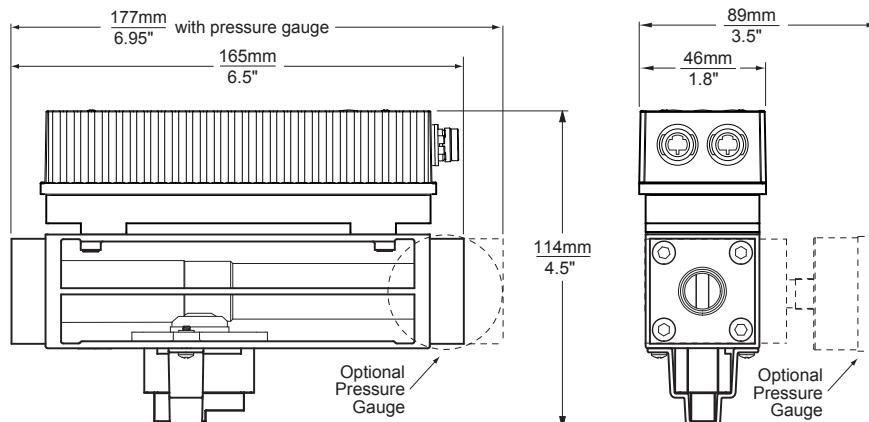

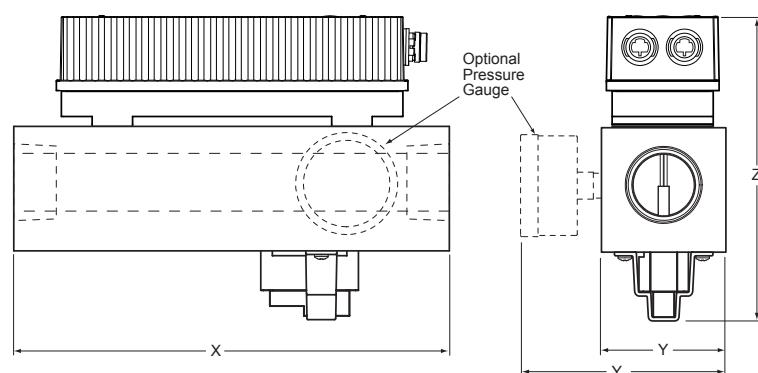

Flow accuracy	+/-1.5% of Full Scale
Temp. range	0°C to 120°C
Temp. accuracy	+/-0.5°C
Operating pressure	10.3 bar max (150 psi max)
Power supply	8 to 28 VDC (external)
Switch rating	30 VDC/30VAC
Flow and temp. signals	0 to 5 or 0 to 10 VDC

Materials

Sensing element	Silicone-Based MEMS Sensor

FLOWMETERS

BLUETOOTH INTERFACE FLOWMETERS

VMBT

The Apple logo and iTunes are trademarks of Apple Inc., registered in the U.S. and other countries.
Google Play and the Google Play logo are trademarks of Google Inc.

Features and benefits

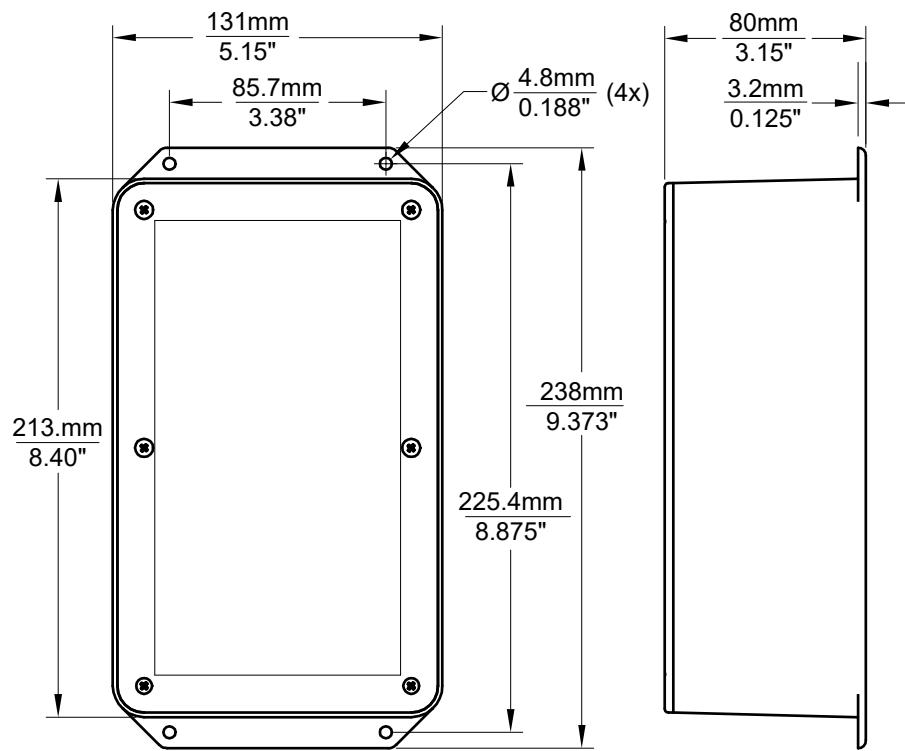

- Transmits temperature and flow conditions in real time to mobile devices for process monitoring up to 20 meters away.
- Simplifies multiple Tracer_{VM} Base installations by providing power, ground and signal termination near the process.
- Gasketed, water-resistant plastic enclosure provides secure mounting in locations where occasional water spray is present.
- Housing mounting holes are integral for easy installation.
- Ethernet port connects the Interface to a local network for communication with Data Logger software.
- USB port provides mobile device charging plus flash drive connection.
- Smartflow Data Logger PC software included.
- It can be connected up to 8 flowmeters at one time.

Specifications:

Housing	NEMA4X compliant
Operating temperature	0°C to 52°C
Maximum wireless range	20 m
Distance to Bluetooth I/F	3 m
Power required	8 to 28VDC with earth ground (external)
Cord grips	9 pc. light-tight inclu.
Data logging software	Included

EJECTOR CUTTING MACHINES

DME CUTTING MACHINES

CUTTING-GRINDING MACHINE

DCMMAX

**Description**

The DCMMAX300 machine is suitable for cutting ejector pins to length, this is done by precision cutting and front grinding. The cast structure supports the control linkage, the disk-grinding wheel supports the spindle. The micrometric adjustment striker is controlled by a digital rod with centesimal resolution display. An adjustable lever on the spindle side allows the excess metal to be removed while maintaining the machine at position zero. To prevent accidents at start up & shutdown, when changing the workpiece, the control lever needs to be released.

Technical specifications

Max. cuttable diameter	20 mm
Cutting disc diameter	150 mm
Grinding wheel diameter	78 mm
Rotation speed	7500 rpm
Motor power	0,75 kW
Electric connection	400V / 3 Phase
Weight	30 kg
Important	Compressed air required

REF	Description
Machines

MOULD MAINTENANCE TABLE

SERVICE TABLE - INFO

SERVICE TABLE FOR MOULDS - GENERAL OVERVIEW

Info

This new generation of platform is specifically designed for:

- Opening and closing of moulds
- Access to each part of the mould for maintenance
- 360° Rotation of each mould-part for direct access to the tool
- 2 sizes for maximal load 1.500 kg / 2.000 kg / 3.000 kg and 2 sizes for maximal load 6.000 kg
- Optional base-platform to raise total height to 850 mm

MECHANICAL CLAMPING BRACKET (EQ)

available in 2 standard sizes

**MAGNETIC CLAMPING BRACKET (XL)**

available in 6 standard sizes

**OPTIM TABLE WITH SLIDING PLATES**

Standard with screw holes

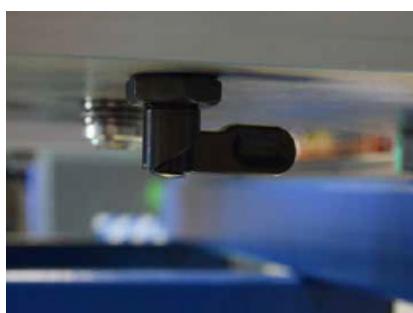

- EQ** for bracket with mechanical clamping
- XL** for brackets with magnetic clamping

**ALUMINIUM PLATE**

Use this plate to store the tools you're using when working on the mould

**Mechanical stop**

It keeps the mould plate in position.
Only available for Optim tables with plates with T Slot (EQ or MB at the end of the Reference).

**Rotation locking lever**

Once you have turned the mould to the position you require, lock the rotating plate with the lever.

**Special Length with Mechanical Bracket**

Ask DME for a custom Optim table. More dimensions and combinations are possible on demand.

OPTIM TABLE STANDARD AND XL VERSION 1,5 / 2 / 3 TONS

OPTIM TABLE STANDARD AND XL VERSION MAX LOAD 1,5 / 2 / 3 TONS

OPTIM**ADVANTAGES**

- Top pivot plates easily rotates 360° with locking indexing every 90°
- Mobile pivot plate can be locked into position at the end of opening stroke
- Pivot plates allows the Mould and Plates to be separated and rotated without the use of cranes

OPTIONS

- Base platform provides a working height of 850 mm (33.46") includes adjustable feet to adjust working height
- Base platform is available with or without the aluminum tool plate
- Mechanical Brackets to support plates
- Magnetic Brackets to support plates
- T-Slots on pivot plates

CLEANING CONCENTRATES

CLEANING SOLUTION

USC A1

Features:

- Cleaning concentrate (alkaline) for electronics and fine optics.
- Removes light oils, grease, fluxing agents, dust, finger prints, etc.

REF	L
USCA12-5	2,5
USCA110	10
USCA125	25

CLEANING SOLUTION

USC A2

Features:

- Intensive cleaner (ammoniacal) with brightening effect for nonferrous and precious metals.
- Removes grinding, polishing and lapping media, grease, oil, etc.

REF	L
USCA22-5	2,5
USCA210	10
USCA225	25

CLEANING SOLUTION

USC A3

Features:

- Cleaning concentrate (alkaline) for iron, steel, stainless steel and precious metals.
- Removes punching oil, drawing grease, soot, forge, grinding and polishing media, high-performance cooling lubricants,etc.

REF	L
USCA32-5	2,5
USCA310	10
USCA325	25

CLEANING SOLUTION

USC A4

Features:

- Universal cleaning concentrate (alkaline)
- Removes oil, grease, soot, coking, forge, dust, finger prints, etc.

REF	L
USCA42-5	2,5
USCA410	10
USCA425	25

CLEANING SOLUTION

USC A5

Features:

- Powerful cleaner (alkaline) in powder form for iron and light metals.
- Removes forged and gummed oil and grease, grinding and polishing media, lacquer and paint remnants, wax, etc.

REF	kg
USCA50-85	0.85
USCA525	25

CLEANING SOLUTION

USC N1

Features:

- Neutral cleaning concentrate.
- Removes oil, grease, grinding, lapping and polishing media, dust, sweat, finger prints, etc.

REF	L
USCN12-5	2,5
USCN110	10
USCN125	25

CLEANING SOLUTION

MICROTEC: HAND WELDING MACHINE

MT 2500

Technical data	Microtec 2500 Standard function	Microtec 2500 Precision function
Input voltage	230 V, 50 - 60 Hz	230 V, 50 - 60 Hz
Charging voltage	1000 VA	400 VA
Control system	SCR pulse system	SCR pulse system
Cycle time	0,2 - 0,4 sec.	0,2 - 0,4 sec.
Power output	1000 W	400 W
Output voltage	0 - 10 V	0 - 6 V
Dimensions WxDxH	375 x 520 x 270 mm	375 x 520 x 270 mm
Weight	35 kg	35 kg

Standard equipment

- Control unit, mains cable, foot switch cable for electrode holder (1300 mm), ground cable (1300 mm) with copper ground plate (2 x 20 x 100 mm)
- Electrode holder black Ø 2, 3 and 4 mm (1 off each) Ø 5 mm (2 off)
- Electrode holder, brown Ø 3 mm (2 off) Ø 4 mm (1 off)
- Magnetic electrodes Ø 2 x 50 mm, Ø 3 x 50 mm, Ø 4 x 50 mm, Ø 4 x 60 mm (1 off each)
- Standard electrodes Ø 2 x 50 mm, Ø 3 x 50 mm, Ø 4 x 50 mm, Ø 5 x 60 mm (1 off each)
- Standard flat electrodes 1,2 x 5 x 35 mm
- Adapter for clamping of flat electrodes
- Tool cabinet
- Sheet metal shears
- 1 pair of protective gloves
- 1 off protective glasses
- 1 off adhesive tape
- 1 off spare fuse
- Welding powder (50 g each):
 - MP 66/N 51 (approx. 63 HRC)
 - MP 70/N 80 (approx. 38-40 HRC)
- Sheet metal strips (10 off each):
 - NAK 80 - 0,1 x 5 x 100 mm, approx. 38-40 HRC NTA 1 - 0,1 x 30 x 70 mm, approx. 135 HV NTA 2 - 0,2 x 30 x 70 mm, approx. 135 HV

HOT RUNNER CONTROLLERS

DME SMART SERIES® M2+

M2+

**ADVANCED HOT RUNNER TEMPERATURE CONTROL AND PROCESS MONITORING WITH WORLD CLASS FEATURES**

A fully featured controller platform with advanced capabilities for superior moulding performance. Well suited for tight process control on all co-injection applications, it is your best choice as a direct replacement for many existing outdated controller platforms.

Unlock your operations full potential.

Key features**LARGE INTUITIVE TOUCH SCREEN CONTROLS**

- Modernized interface
- Quick and easy to use
- Rapid response rates
- Familiar gestures like pinch-to-zoom
- Available in 8", 12" and 17" formats

ADVANCED FUNCTIONALITY

- KORTEC auto cavity balancing
- Auto leak detection
- Auto tool diagnostics
- TC auto slave
- And much more

IO ALARM INTERLOCK

- Interface with any injection machine
- Triggers an alarm when issues are identified
- Pauses the moulding process until corrected
- Helps maintain process consistency

WIRELESS NETWORK CONTROL (WLAN)

- Multi cell operation
- Multiple IP operation
- Download/Upload tool set-up
- Valuable for clean room applications

Cabinet Size	# of Cards (Max)	# of Zones (Max)	Dimensions WxDxH cm (in.)
XS	6	24	31x45x81 (12x18x32)
S	12	48	36x45x96 (14x18x38)
M	24	96	45x60x116 (18x24x46)
L	36	144	45x60x141 (18x24x56)
XL	63	252	56x61x168 (22x24x66)

Based on 4z-15A cards. Increase max zones with 6z-5A cards.

Includes

- 4.8 m (15') cable set.
- Quick start guide.

DME SMART SERIES® M2+

M2+

Specifications	
User Interface	Full Color LCD Touch Screen
Display Sizes	8" (203mm), 12" (305mm), or 17" (432mm)
Control Algorithm	APS (Adaptive Process System)
Power Control	Phase Angle and Burst Firing Modes (Time Proportional, Zero-Crossing)
Control Accuracy	+/- 0.5°C (1°F)
Display Resolution	0.1 (°C or °F)
Power Response Time	8.3 ms at 60 Hz
Temperature Scale	°C or °F (Software Selectable)
Thermocouple	J or K-Type (Software Selectable)
Operating Range	0 - 472°C (32 - 882°F)
Output Voltage (Max)	264 VAC
Supply Voltage	200/240V 3P Delta or 380/415V 3P Star with Neutral (480V, 3P with optional transformer)
Frequency	50 - 60 Hz Automatic Switching
Ambient Temperature Range	5 - 45°C (41 - 113°F)
Humidity Range	Up to 95% non-condensing
Ground Fault Detection	40mA per Zone
Alarm Output	Closing Contact Relay 5A, 230V (Max)
T/C Connector	Various Options Available
Power Connector	Various Options Available
Input Protection	63mA Nano Fuses on Both T/C Legs
Overload Protection	Semi-conductor fuses on both heater legs
Heater Fuses	15A @ 220V Fast Blow Type
Control Modes	Closed Loop (Auto), Open Loop (Manual), Standby, Boost, Slave
Ports	USB and Ethernet
LED Indicators	Scan, Fuse, Thermocouple, Failure, Ground Fault, Power%
Communications	SPI, Real VNC, Modbus, OPC-UA
Languages	English, French, German, Portuguese, Spanish, Polish, Russian, Chinese, Japanese, Czech, Italian, Turkish

**HOT RUNNER TEMPERATURE CONTROL MADE SIMPLE AND ECONOMICAL**

The Me controller platform combines essential features with advanced APS Technology for precision hot runner temperature control. Powerful performance from a compact unit that helps improve part quality and minimize scrap. Optimize the performance of any hot runner system and unlock your operations full potential.

Key features**INTUITIVE TOUCH SCREEN COLOR DISPLAY**

- Simple, user friendly interface
- Allows for immediate familiarization
- Monitor up to 12 zones at once

INTEGRATED 15-AMP CONTROL CARDS

- Power to control a wide range of hot runner zones from nozzle tips to larger manifolds
- On-board heater fuses
- Quick and easy service access from the cabinet top and bottom

COMPACT, STACKABLE CABINET DESIGN

- Preserves valuable space
- Can be placed almost anywhere
- Available in 6 or 12 zone configurations
- Lightweight

2 YEAR COMPREHENSIVE WARRANTY

- Worry free global support coverage
- Protects against manufacturers defects (fuses excluded)

**includes:**

- 4.8m (15') Cable Set
- Quick Start Guide

WORKBENCH

WORKBENCH

ERGONOMICAL WORK BENCH

PWT 300 - PWT 600

**Features**

- Continuous height adjustment from 700 to 1100 mm
- Operation by electric hydraulics
- Fixed or on wheels
- Variable workbench size and material
- Extensive accessories upon request
- Sturdy steel construction with environmentally friendly, solvent-free powder-coating
- Loading capacity: 300 kg - 600 kg max.
- Favorable cost-benefit ratio
- Electrical connection 230V / 50 Hz

HAND TOOLS

HAMMERS

SIMPLEX HAMMERS

HA 13

**Description:**

- Noise-dampening
- Vibration-reducing
- High resistance to breakage
- Extremely durable
- Integrated handle-protection sleeve
- 2 different inserts allow to use the same hammer on different materials
- Nylon insert is hard, wear resistant, oil and grease resistant, doesn't chip even when hitting edges,
- Soft metal insert is hard, heat resistant, can be used for very hard strikes without damaging the workpiece

Replacement:

- Tightened with just one screw
- All wear parts are easily replaceable
- See spare parts below

Application:

- Mould construction
- Assembly and repair work

PRY BARS

PRY BAR

70

- Heat-treated to Rc 52–54
- Heavy-duty forged steel
- Rust-resistant black oxide
- Preferred by many molders for their toughness and balance
- Smooth finish tapers
- In-stock at low prices
- Same brand as sold by others... only we charge less!
- Made in U.S.A.

For Pry Bars sold separately reference items below
Complete Kit contains one of each tool - Model Number PBK999

REF		Length		
7025	Angle Head Bar	20"	5/8" Hex	Stock Wt. 1 lb. 6 oz.

7035	Radius Head Bar	18"	5/8" Hex	Stock Wt. 1 lb. 4 oz.

PRY BAR

WZ71470

- This forged steel pry bar, with a black oxide finish, is a practical tool for use in separating punch and die holders without damage to the die.
- With its soft tempered brass shoe and bronze alloy tip, the pry bar easily separates the die without harming surfaces.
- Both shoe and tip are easily removable and replaceable.
- Overall length is 46 cm.

SCREWDRIVER SET

SCR 5

- Set of 5 screw drivers
- Custom made for the complete DME range of date stamps
- Blades made of chrome-vanadium-molybdenum-steel fully hardened and chromium plated for precision and long life
- Ergonomic handle design
- Color coded pivot cap
- Extremely precise fit of the tip

POLISHING MACHINES

ULTRASONIC LAPP AND POLISHING MACHINE - ULTRAFORM

ULTRAFORM - ULTRASONIC LAPP AND POLISHING MACHINE

UF0103

NEW

ULTRAFORM UF0103 is an easy operational lapping and polishing machine. It becomes operational just by connecting the power switch to the power source and the hand piece cord to the controller. It satisfies the expert and skilled polishers for the professional use thanks to its features:

- Rough polishing and grinding with the maximum output power of 100W aggressively (High power version)
- Ultra-fine polishing with the Amplitude of under 1 micron gently. (NANO mode)
- Polishing mode selection by one-touch button (CLAMP button)
- The Hard mode keeps a constant vibration level against the thrust forces applied to the tool, thus leading to powerful polishing.
- The Soft mode automatically reduces vibration depending on the thrust force applied to the tool, thus preventing excessive grinding.
- Amplitude adjustable in 99 steps.
- Status check of ultrasonic vibration visibly in the built-in LCD monitor.
- DC motor rotary hand piece (PHP35) with excellent polishing and aggressive grinding power
- 2 types hand pieces available, the large-sized hand piece (UF-7405) and the light and compact-sized hand piece (UF-9705)
- Easy exchange of the hand pieces as the detachable motor cord is applied.
- Auto-Power-Off function ensures the safety

Available options:

ALL-AROUND SET UF0103AS = UF0103 machine + PHP35 DC motor Rotary handpiece + UF7405 hand piece (hard work) + UF9705 hand piece (soft work) + accessories (cables, stone, files)

NANO SET UF0101NS = UF0103 machine + UF9705 hand piece (soft work) + accessories (cables, stone, files)

Description	UF0103
Supply voltage	Single phase AC100 to 250 V 50/60 Hz
Power output	100 W max.
Amplitude adjustment	in 99 steps
Power consumption	300 VA
Frequency of vibration	17-31 kHz Automatic feedback
Amplitude (stroke)	1-30 µm
Fuse	1,5 A (REF UF 7031)
Dimensions	180Wx263Dx229H mm
Weight	5,3 kg

Set includes:

- Power Pack UF0103
- DC motor Rotary handpiece PHP35
- Ultrasonic handpiece UF9705
- Standard tools for handpiece UF9705
- Power cord
- Ultrasonic handpiece UF7405 (in All-Around set)
- Standard toolbox for handpiece UF7405

All-round set	UF0103AS

ULTRASONIC POLISHING SYSTEM - ULTRAFORM

ULTRASONIC POLISHING SYSTEM ULTRAFORM

UF0101AS

UF0101AS Allround Set
including handpieces UF7401 & UF9701

- A single set offers both powerful heavy polishing and delicate soft polishing.
- Ultra-fine polishing through precise amplitude control at 99 levels.
- Output of up to 100W.
- A built-in LCD monitor indicates the status of vibrations and the settings (in addition to error status).
- Various polishing modes (Hard/Soft) depending on the work.
- Even if the tool generates heat during work, the oscillator lowers the power output to continue work.
- The auto power-off function ensures power shutdown.
- Output information is saved in memory depending on the work.
- A new "NANO mode" further provides ultra-fine amplitude control.

Other sets available:

UF0101TS including large-sized handpiece UF7401 ideal for powerful work.
UF0101NS including handpiece UF7901 best suited for delicate work or long hours.
Contact DME for more info!

Frequency	17-31 kHz Automatic feedback
Maximum output	100W
Amplitude adjustment	99 steps
Power supply	Single phase AC100 to 250V 50/60Hz
Electricity consumption	300VA
Outer dimensions	226W x 252D x 180H (mm)
Weight	5,2 kg

Optional:
Foot switch

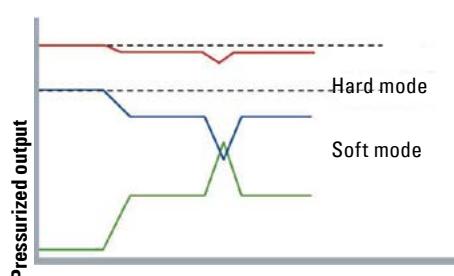

REF	
All Nano Set	UF0101NS
All Round set	UF0101AS
Tough set	UF0101TS

**USER-FRIENDLY OPERATING SCREEN****Manual mode***

Displays information about equipment status, frequency and output.

Menu screen**

Saving the output value during memory mode as well as setting the filing Mode and automatic power off feature, etc., are performed on the menu screen.

**FROM ROUGH GRINDING TO ULTRA-FINE POLISHING**

Two types of polishing modes (Hard/Soft) are alternately available on a single set.

The Hard mode keeps a constant vibration level against the thrust forces applied to the tool, thus leading to powerful polishing.

The Soft mode automatically reduces vibration depending on the thrust force applied to the tool, thus preventing excessive grinding. This mode is suitable for delicate work.

ULTRASONIC LAPP AND POLISHING MACHINE

ULTRASONIC LAPP AND POLISHING MACHINE

UF 5600

The use of ultrasonic energy in combination with conventional machining tools for the finishing of very small areas of molds and tools makes it possible to achieve a high-quality surface finish and to save time compared with conventional polishing methods.

The consistent development of the Ultraform systems as regards performance, efficiency and handling is bringing decisive improvements in the machining of spark-eroded gates, slots, cavities and complicated contours.

- 50 % increase in performance compared with previous models.
- New control electronics ensure a constant work output even when there is a variation in cutting pressures.
- The amplitude/stroke length is in the range 4-40 µm for optimum finishing.
- New, expanded tool range including ceramic stones and synthetic resin-bonded diamond stones.
- Universal hand piece UF 9700 enables the employment of the complete tool programme. Standard tools with M4 connecting thread for machining of small molds and tools with M6 connecting thread for large machining depths are available to the user. Special adapters also ensure that customised tools can be used.
- Model UF 5600 also permits the use of Argofile AF-Series electromechanical hand pieces. Modern transformer electronics achieve a constant torque and increased operational reliability of the hand pieces.

Includes:

- 1 ultrasonic hand piece UF 9700
- 1 wooden case for Ultrasonic hand piece
- 1 ultrasonic hand piece PHP 35
- 1 toolbox
- assembly spanner
- ear (plugs) protection
- fuses
- 1 adaptor MS 0064
- 1 protection cap UF 7025
- 1 diamond file SE 8851, SE 8751, SE 5845, SE 5745
- 1 diamond stone SD 5831, SD 5851, MD 8862
- 1 diamond stone MD 4872, MD 4772
- 1 ceramic stone SC 4548, SC 4448, SC 4561, SC 4461, SC 1530, SC 1430
- 1 polishing wood SO 1103, SO 4163
- 1 tool clamp MX 4008, MX 4020, MX 4010, MX 4030, MX 1030, UF 7023

The model enables the use of Argofile AF-series electromechanical hand pieces.

Description	UF 5600
Supply voltage	220 V~ ± 10%, 50 Hz
Power output	45 W max.
Output adjustment	continuously variable
Power consumption	200 W

POWERPACK

POWERPACK

PA 480

The completely re-designed power pack PA 480 offers improved engineering paired with modern outlook.

The well arranged foil control panel protects the unit from acidic substances. Power output depending on utilisation factor is controlled by integrated micro control conductors.

By using modern MOSFET-technology a minimum amount of power dissipation is obtained, which also results in low heating of the power pack.

The sturdy metal housing is shock-proof and dirt resistant. Appropriate hand pieces are available to suit the various applications. The Argofile units have been designed in accordance with the latest state-of-the-art and ergonomic requirements.

By all means a fatigue-free operation is ensured since the power pack is running in a silent and low vibration manner. The hand pieces are connected to the unit via flexible cables.

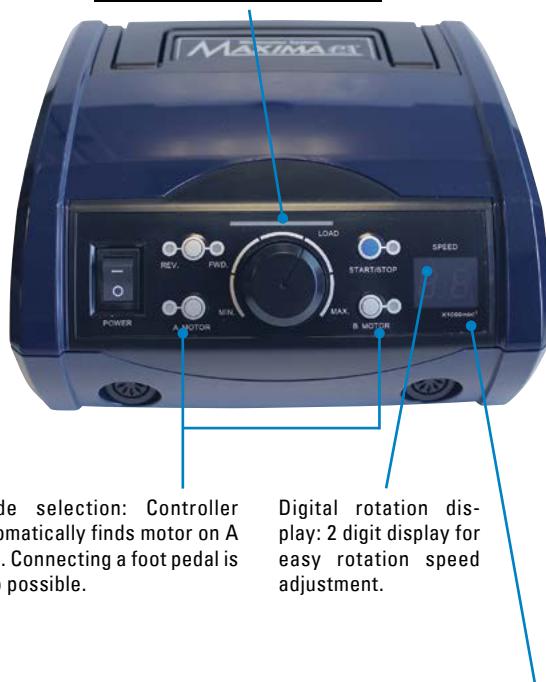

Description	PA 480
Supply voltage	230 V~ ± 10%, 50 Hz
Output voltage	0 - 30 V = (DC)
Power output	max. 2 x 70 W
Outputs	2, individually controlled
Fuse	2,0 A
Dimensions	259 x 240 x 81 mm
Weight	3,900 kg

MAXIMA EX MICROMOTOR SYSTEM**EXP230**

Load indicator: Clear 8-step load indicator with overwork caution for longer service life.

Mode selection: Controller automatically finds motor on A or B. Connecting a foot pedal is also possible.

Digital rotation display: 2 digit display for easy rotation speed adjustment.

Error code: An error code for easy trouble shooting is displayed in case of e.g. overheating, overload, or defects...

Input voltage: 230V (AC100, 120 upon request)
Weight: 2,3 kg
Dimensions: 200 x 180 x 110 mm (W x D x H)

Micro computer control:

Built-in micro computer automatically controls the best suited torque for each motor enabling smooth operation.

Auto cruise foot pedal:

possible fixed rotation speed when using a foot pedal.

Self diagnostic function:

Self checking motor and controller. Automatic cooling in case of overheating.

Operation volume control:

Adjustable sound alarm in case of overworks.

MAXIMA NEO POLISHING MACHINE

MAXIMA-NEO

A more powerful model called "MAXIMA NEO" has been joined to the MAXIMA Series. With the new design, the powered-up model has further evolved and as new functions, a Digital Rotation Speed Display Function and a convenient Pause Function are standard equipment. With its excellent Dustproof Function and Rotational Accuracy, it can perform not only precision work such as dental laboratory, jewelry, and wood carving, but also various mold polishing and deburring powerfully.

Lightweight and high-precision handpieces are suitable for a wide range of applications from fine polishing to powerful grinding. The collet chuck uses a convenient one-touch opening/ closing method, and the tip tool can be attached / detached without using a special spanner. In addition, the standard foot pedal is a variable type with an upper limit that can be set.

Your benefits:

- Stepless control - steplessly controls the rotation speed of the hand piece
- Rotation direction change - One-touch operation to switch between forward and reverse rotation
- Variable foot control - Controls the rotation speed of the motor by stepping on
- Overload protection - Stops and protects the hand piece when the motor is overloaded
- Variability - The Maxima Neo controller can be placed horizontally or vertically
- Quick chuck system - allows you to attach or detach tip tools with one

MOTORS

SUSPENDED MOTOR PREMIUM

HM PRE 24 J

**Features:**

- continuous speed regulation up to 24000 rpm
- power 800 W
- high performance at low speed
- safe soft start-up
- to use with electronic speed control, also available with speed limitation control

REF

HMPRE24J

CONTROLLER

HM PRE FC 24 0...

- electronic foot control (pedal) up to 24000 min⁻¹; continuous speed regulation
- electronic foot control (round) up to 24000 min⁻¹; continuous speed regulation
- desk control up to 24000 min⁻¹; continuous speed regulation

HMPREFC2403

FLEXIBLE SHAFT

HM FLEX J-P

**Features:**

- connection type "J"
- with expanding spring or duplex spring
- 6 x 1100 mm
- motor side connection: Quick-change (universal fit)

REF

HMFLEXJ-PDUP

HMFLEXJ-PEXP

"P-TYPE" : QUICK-CHANGE MOTOR CONNECTION (FITS ALL)

HM FLEX J

**Features:**

- connection type "J"
- with expanding spring or duplex spring
- 6 x 1100 mm
- motor side connection: Standard connection type

REF

HMFLEXJDUP

HMFLEXJEXP

"J-type": Standard motor connection

PREMIUM SERIES SET

HM PRE 24 JP SET

**Includes:**

- Suspended motor Premium (HM PRE 24 J)
- electronic foot control (HM PRE FC 24 02)
- Quick-change flexible shaft (HM FLEX J-P DUP)

handpiece not included

REF

HMPRE24JPSET

TURBOLAP LINEAR AND SWING PROFILERS

TLL ... - TLS ...

The perfect tools with ergonomic soft grip for polishing fine detail areas and ribs and slots. The TurboLap should be used at maximum 5 bar.

These tools provide excellent performance with Ceramic Super Stones and Cristones®.

The TurboLap Linear is particularly powerful for polishing narrow areas and corners of precision parts and components.

Outstanding efficiency by the high-torque air turbo mechanism.

Use of a filter and fog lubrication device is recommended for a long service life.

DIPROFIL FILES & TOOLS

DI-PRO

DI-PRO POLISHING/FILING MACHINES

Info

The Di-Pro™ represents a new standard of high-end polishing/filing machines with an increased focus on the operator's well-being. The low levels of vibration greatly reduce the risk of Hand Arm Vibration Syndrome (HAVS) – without compromising performance.

The dangers of Hand-Arm Vibrations (HAV) have in recent years been focused as one of the main occupational hazards all over the vibrating tools-using industry. With this in mind Diprofil has developed a high quality low-vibrating machine with reduced vibration levels and the same renowned quality standard as the Classic Diprofil Machine.

To achieve as low vibration levels as possible, the Di-Pro™ has been optimized for tools within a certain weight-span. This is based on Diprofil's long experience in tools normally used with this type of machine and keeping within this weight-span gives optimal efficiency in relation to the vibration levels.

For the best efficiency to vibration-ratio, the following tools are recommended:

- Diprofil diamond files type DLA, DLE, DLF, DLM and DBE
- Selected Diprofil lapping tools
- Selected Diprofil polishing tools
- Di-Pro stoning- & polishing tools

The Di-Pro™ is available with the following drive sources:

- Flexible shaft connection (slip-joint / ball-joint)
- Integrated micro-motor
- Integrated air-motor

FLEXIBLE-SHAFT DRIVEN MACHINE WITH SLIP-JOINT CONNECTION

FXB - FFK

Drive: The FXB and FFK models should be driven by an electrical hanging-motor with speed control and a flexible-shaft with slip-joint connection (European standard) e.g. Diprofil type DSE-47. Corresponding motors of other brands may also be used.

Speed (maximum): 7.000 rpm

Speed (recommended): 5.000 – 7.000 rpm (depending on the weight of the used tool).

Stroke length: 0 – 6 mm (recommended 0,5 – 4 mm NOTE! At stroke lengths exceeding 4 mm a maximum speed of 5.000 rpm is recommended).

Weight: FXB: 740 g, FFK: 780 g

Noise level: not exceeding 75 dB A at 7.000 rpm

Vibration levels: Not exceeding 2,5 m/s² when the machine is operated according to the operation guide.

For more information about vibration levels when using certain tools at different speeds and stroke lengths, please see the operation guide. Frequency weighed hand/arm vibration principally in accordance with ISO 28927-8.

REF	Tool holder
FXB	Ø 3,5 mm
FFK	Ø 6,4 mm

AIR DRIVEN MACHINE

FXD - FXL

Drive: The FXD and FXL models have a built in air-motor and should be driven by compressed and oil mist lubricated air. PLEASE NOTE! The built-in air-motor may be damaged, if operated with un-lubricated air. Connection: The Diprofil quick-coupling HSL-M and fog lubrication unit MFB should be used for connection to your compressed air system.

PLEASE NOTE! Protect the air inlet from dust and dirt, when not in operation.

Speed (maximum): 7.000 rpm

Speed (recommended): 5.000 – 7.000 rpm (depending on the weight of the used tool).

Stroke length: 0 – 6 mm (recommended 0,5 – 4 mm) NOTE! At stroke lengths exceeding 4 mm a maximum speed of 5.000 rpm is recommended.

Weight: FXD: 880 g, FXL: 920 g

Oil consumption: minimum 30 mm³/min. at maximum speed (about 2 drops/min.)

Air pressure: 4 bar (57psi)

Air consumption: Approx. 60 l/min at 7.000 rpm

Noise level: not exceeding 75 dB A at 7.000 rpm

Vibration levels: Not exceeding 2,5 m/s² when the machine is operated according to the operation guide.

For more information about vibration levels when using certain tools at different speeds and stroke lengths, please see the operation guide.

REF	Tool holder
FXD	Ø 3,5 mm
FXL	Ø 6,4 mm

MACHINE WITH BUILT-IN MICRO-MOTOR

FXP - FXM

Drive: The FXP and FXM models have a built-in micro-motor, which is connected to, and controlled by, the DIPROFIL DPU-3, TPU-20 or corresponding power units.

Speed (maximum): 7.000 rpm

Speed (recommended): 5.000 – 7.000 rpm (depending on the weight of the used tool).

Stroke length: 0 – 6 mm (recommended 0,5 – 4 mm) NOTE! At stroke lengths exceeding 4 mm a maximum speed of 5.000 rpm is recommended.

Weight: FXP: 960 g, FXM: 980 g

Noise level: not exceeding 75 dB A at 7.000 rpm

Vibration levels: Not exceeding 2,5 m/s² when the machine is operated according to the operation guide.

For more information about vibration levels when using certain tools at different speeds and stroke lengths, please see the operation guide. Frequency weighed hand/arm vibration principally in accordance with ISO

ORIGINAL RECIPROCATING POLISHING/FILING MACHINE

Info

The Original Diprofil Reciprocating Filing Machines are designed for efficient polishing and finishing operations.

The Diprofil Machines, with a wide range of tools and accessories, have been developed by careful studies of fine mechanical handwork and finishing operations. They facilitate filing, lapping, honing, polishing etc. and have become an important concept in the daily work of moldmaking, die-sinking, toolmaking and other fine mechanical precision work.

All Diprofil Machines are delivered in a handy tool-box with the necessary accessories.

AIR DRIVE

FPD/R - FPL/R

The air-driven Original Diprofil Filing Machine, has a specially developed 18-cylinder radial piston-type air motor with integrated speed regulator. The machine is available with a Ø 3,5 mm tool holder (FPD/R) or a Ø 6,4 mm tool holder (FPL/R).

The airmotors are manufactured with a very high level of accuracy and require lubricated and filtered air (5μ) to obtain a long and trouble-free lifetime.

For better comfort, each model is fitted with an ergonomic rubber sleeve.

Stroke length: 0-6 mm (recommended 0,5-3mm)

Speed: max 8.000 rpm (recommended: 5.000 - 7.000 rpm)

Weight: 750 - 780 g

Oil consumption: minimum 30 mm³/min. at maximum speed (about 2 drops/min.)

Air pressure: FPD/R: 4 bar (57psi), FPL/R: 4 bar (57psi)

Air consumption: FPD/R: Approx. 65 l/min at 8.000 rpm, FPL/R: Approx. 60 l/min at 7.000 rpm

Noise: < 70 dB(A) at 7.000 rpm

Vibration: with standard tool holder (Ø 3,5 mm) 3-10 m/s², with heavy duty tool holder (Ø 6,4 mm) 4-12 m/s².

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the cor-

FLEXIBLE-SHAFT DRIVE - SLIP JOINT CONNECTION

FPB/R - FPK/R

The Original Diprofil Filing Machine for flexible-shaftdrive is available for connection to Slip Joint.

The machines can be supplied with two different tool holders, standard Ø 3,5 mm (FPB/R) or heavy duty Ø 6,4 mm (FPK/R). For better comfort, each model is fitted with an ergonomic rubber sleeve.

Stroke length: 0-6 mm (recommended 0,5-3mm)

Speed: max 8.000 rpm (recommended: 5.000 - 7.000 rpm)

Weight: 585 - 615 g

Noise: < 70 dB(A) at 7.000 rpm

Vibration: with standard tool holder (Ø 3,5 mm) 3-10 m/s², with heavy duty tool holder (Ø 6,4 mm) 4-12 m/s².

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

CLASSIC DIPROFIL

MICRO MOTOR DRIVE - INTEGRATED MICRO MOTOR

FPP/R - FPM/R

The Original Diprofil Filing Machine for Micro motor drive can be supplied with two different tool-holders, standard Ø 3,5 mm (FPP/R) or heavy duty Ø 6,4 mm (FPM/R).

These have a built-in micro-motor, which is connected to, and controlled by, the DIPROFIL DPU-3, TPU-20 or corresponding DME/EOC power units (e.g. Grande,...). For better comfort, each model is fitted with an ergonomic rubber sleeve. The machine is also available with Eneska 3-1 connector (FPM/ERJ, FPP/ERJ).

Technical data

Stroke length: 0-6 mm (recommended 0,5-3mm)

Speed: max 8.000 rpm (7.000 rpm at 32V)

recommended: 5.000 - 7.000 rpm

Weight: 800 - 830 g

Noise: < 70 dB(A) at 7.000 rpm

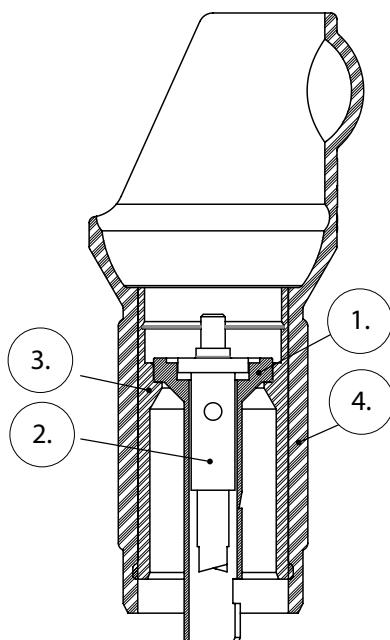

Vibration: with standard tool holder (Ø 3,5 mm) 3-10 m/s² with heavy duty tool holder (Ø 6,4 mm) 4-12 m/s².

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

DIPROFIL PROTECTIVE FINGER SLEEVES

Info

The old (wrong) way...

The new (right) way!

To further emphasize our focus on the importance of reducing potentially harmful vibrations we are now introducing the new Diprofil Protective Finger Sleeve.

It's a well known fact that it's actually more common for operators to sustain vibration related injuries in the hand guiding the tool rather than in the hand holding the actual machine. With this in mind we have developed the Diprofil protective finger sleeve. The finger sleeve will improve guidance of the tool as there is no longer any need for putting your fingers on moving tools and/or machine parts.

The finger sleeve is compatible with both the Classic and the low-vibrating Di-Pro polishing-/filing machines and comes with an extension rod for longer tools in two different versions depending on the size of the original tool-holder (\varnothing 3,5 or 6,4 mm).

For more information on each specific item please see the technical information above.

The two different models available for either 3,5 or 6,4 mm tool-holders are the following:

PFS-3,5 - Compatible with both the Classic and the low-vibrating Di-Pro, polishing-/filing machines fitted with 3,5 mm tool-holders.

PFS-6,4 - Compatible with both the Classic and the low-vibrating Di-Pro, polishing-/filing machines fitted with 6,4 mm tool-holders.

Both versions comes in a handy box with the necessary tools and an instruction on how to attach it to your machine.

PROTECTIVE FINGER SLEEVE FOR THE \varnothing 3,5 MM TOOL-HOLDER**PFS-3,5**

DIPROMINI

DIPROFIL MINI POLISHING/FILING MACHINES

Info

A complete system for working on difficult surfaces. Low weight and a thorough ergonomic design results in a more effective finishing and polishing work, especially in narrow and confined spaces.

The Diprofil Mini Filing Machine is available with 3 different stroke lengths. For lowest possible vibration levels we recommend using light weight tools and tool-holders.

Using the Diprofil Mini Filing Machine gives you total control even when working in the most narrow spaces on a delicate workpiece.

All Dipromini machines are delivered in a handy tool-box with the necessary accessories.

FLEXIBLE-SHAFT DRIVE - SLIP JOINT CONNECTION

FMR/S...

The Diprofil Mini Polishing/Filing machine for flexible-shaft drive is available for connection to Slip Joint. There are three basic models with 0,5 mm (FMR/S5), 1,0 mm (FMR/S10) or 1,5 mm (FMR/S15) stroke length.

Technical data

Tool holder: max Ø 3,6 mm

Stroke length: 0,5, 1,0 or 1,5 mm

Speed: max 12.000 rpm recommended: 5.000 - 11.000 rpm

Dimension: Ø 24 mm

Weight: approx. 120 g

Noise: < 70 dB(A) at 9.000 rpm

Vibrations: stroke 0,5 mm: <2,5 m/s², stroke 1,0 mm: 1,5 - 3 m/s², stroke 1,5 mm: 1,5 - 4 m/s²

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8.

For further details, see diagram and other information in the corresponding Operation Guide.

TRANSVERSE MINI POLISHING/FILING MACHINE

Info

This machine has a transverse movement for working on difficult surfaces, and is especially suitable on narrow shoulders. Variable stroke between 0-4 mm, that is easy to change by use of a hexagon key. The small and handy dimension improves control and effectiveness for polishing and finishing work. For the lowest possible vibration levels we recommend using light weight tools and tool-holders such as the THFS-1 and THPS-3.

All Diprofil Machines are delivered in a handy tool-box with the necessary accessories.

FLEXIBLE-SHAFT DRIVE - SLIP JOINT CONNECTION

FMV/S

The Diprofil Transverse Mini Polishing/Filing machine for flexible-shaft drive is available for connection to Slip-joint (FMV/S).

Technical data

Tool holder: max Ø 3,6 mm

Stroke length: Variable stroke 0-4 mm (60 mm from the machine housing)

Speed: max 12.000 rpm (at max 2 mm stroke length) recommended 5.000-11.000 rpm

Dimension: Ø 24 mm

Weight: 235 g

Noise: < 78 dB(A) at 12.000 rpm

Vibrations: 1,5 - 3,5 m/s²

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8.

For further details, see diagram and other information in the corresponding Operation Guide.

ROTARY HANDPIECE

FOR EFFICIENT POLISHING AND FINISHING OPERATIONS

Info

Rotary handpieces for efficient grinding, polishing and finishing operations with tools such as diamond and CBN pins, felt bobs and wood bobs.
All rotary hand pieces comes with the necessary tools and accessories.

BRUSHLESS ROTARY HAND-PIECE

C-HPM-BL1

Micro-motor driven rotary hand-piece with brushless motor for use together with twin power unit TPU-20. Features a quick change design for both the collet and the tool and is supplied with 3,0 mm collet. Optional 2,35 mm collet available.

Technical data

Speed: max. 40.000 rpm
Consumed power: max. 230 W
Torque: 8,5 N cm
Weight: 350 g
Dimensions: L159 x Ø27 mm
Noise: < 70 db(A) at 40.000 rpm
Vibrations: < 2,5 m/s²

REF
CHPMBL1

BRUSHLESS ROTARY HAND-PIECE

C-HPM-BL2

Micro-motor driven high speed rotary hand-piece with brushless motor for use together with twin power unit TPU-20. Features a quick change design for both the collet and the tool and is supplied with 3,0 mm collet. Optional 2,35 mm collet available.

Technical data

Speed: max. 50.000 rpm
Consumed power: max. 230 W
Torque: 7,6 N cm
Weight: 350 g
Dimensions: L159 x Ø27 mm
Noise: < 70 db(A) at 50.000 rpm
Vibrations: < 2,5 m/s²

REF
CHPMBL2

ROTARY HAND-PIECE

C-HPM-B1

Micro-motor driven high speed rotary hand-piece with carbon brush motor for use together with power unit DPU-3 or twin power unit TPU-20. Features a quick change design for both the collet and the tool and is supplied with 3,0 mm collet. Optional 2,35 mm collet available.

Technical data

Speed: max. 38.000 rpm
Consumed power: 100 W
Torque: 4,0 N cm
Weight: 285 g
Dimensions: L159 x Ø29,5 mm
Noise: < 70 db(A) at 38.000 rpm
Vibrations: < 2,5 m/s²

REF
CHPMB1

MICRO-MOTOR

HPM-B1

DC micro-motor adapted for Diprofil mini polishing/filing machines type FMR/D, FMV/D and rotary hand-piece type C-HPM-B1. For use together with power unit DPU-3 or twin power unit TPU-20.

Technical data

Speed: max. 38.000 rpm
Consumed power: 100 W
Torque: 4,0N cm
Weight: 190 g
Dimensions: L100 x Ø29,5 mm
Noise: < 70 db(A) at 38.000 rpm
Vibrations: < 2,5 m/s²

REF

HPMB1

DIPROFIL POWER UNIT

DPU-3

This compact and ergonomic Power Unit is designed for use together with dedicated rotary hand-pieces and micro-motor driven reciprocating Diprofil polishing/filing machines with carbon brush motors. It has high torque and electrical feedback circuitry. Other features include continuously variable speed, forward / reverse switch and automatic overload protection. Supplied with foot control type DPU-3-FC for optional speed adjustment.

Technical data

Input: AC 110/220 V at 50/60 Hz
Output: DC 0 – 32 V, 1,2 A
Power: max. 100 W
Weight Power unit: 1,7 kg
Dimensions Power unit: W115 x D147 x H96 mm
Weight Foot control: 585 g

REF

DPU3

DRIVE SOURCE

DIPROFIL TWIN POWER UNIT

TPU-20

Twin power unit featuring dual control system for both brushless and carbon brush micro-motors (not simultaneously). Variable speed control by hand dial or the included foot control type TPU-20-FC. Supplied with hand-piece cradle and a convenient magnetic tool holder.

- Digital display showing the speed in rpm
- Maximum torque set mode
- Maximum speed set mode
- Built in handle for best portability
- Error code display function
- Foot control with auto-cruise speed function
- Self diagnosis system

Technical data

Input: AC 200 ~ 240 V at 50/60 Hz

Output: DC 0 – 32 V, 1,6 A, BLDC 0 – 32 V, 1,6 A

Power DC: max. 185 W

Power BLDC: max. 245 W

Weight Power unit: 2,9 kg

Dimensions Power unit: W137 x D232 x H180 mm

Weight Foot control: 575 g

REF

TPU20220V

ADAPTER

D/G

Adapter for connecting Urawa, Argofile and Gesswein front-pieces to the Diprofil micro-motors type HPM-BL1 and HPM-B1 (when using DC motor type HPM-B1 a specific shaft with item no. D/G-7 is also required).

REF

D/G

LUBRICATION

MFB - MFA-K

The Dipro-fog (MFB) package consists of air filter, regulator, manometer, and fog lubrication device, all in one, with tubing and Dipro-fog oil (MFA-K).

Technical data

Max primary pressure: 16 bar

Max capacity at 7 bar: 1200 l/min

Hose connection: 7 mm

Secondary pressure: 0,5 - 10 bar

REF	Description
MFB	Dipro-fog
MFAK	Lubrication oil (0.5 l)

QUICK COUPLING

HSL-M

Each air-driven machine requires a quick coupling (HSL-M) as well as a fog lubricating device type Dipro-fog MFB to ensure efficient lubrication at all times.

A 3-way hose connection and air hose is also available.

DIAMOND & CBN ROTARY TOOLS

Info

Diprofil Rotary Diamond and CBN Tools are made from carefully selected quality diamonds and Cubic Boron Nitride, precisely bonded to obtain the best physical properties for added strength and resistance to wear.

Electroplated Diamond pins and wheels are excellent for general grinding applications in hard materials such as carbide, hardened steel and ceramics. They are normally used without cooling agent but in stationary applications, and when grinding in thin glass cooling is often required. Maximum temperature for Diamonds is 800 °C.

Electroplated cylindrical CBN pins are excellent for general grinding applications in hardened steel. They are normally used without cooling agent but in stationary applications cooling is often required. Maximum temperature for CBN is 1200 °C.

Recommended speeds

Recommend speed for dry cutting:

Diamond: 10 – 20 m/s

CBN: 15 – 30 m/s

Recommend speed for wet cutting:

Diamond: 15 – 30 m/s

CBN: 20 – 45 m/s

Cooling: Cooling normally enhances the lifetime of the tools. In addition it also generates a better surface. The risk for damage on thin or sharp edges of the grinding tool is reduced when using coolant.

Cooling is performed with an emulsion or grinding oil. For diamond tools an Emulsion is specially recommended and for CBN tools a mineral oil is preferable.

RECOMMENDED SPEEDS IN RPM

PRECISION CBN TOOLS

ORIGINAL DIPROFIL PRECISION CBN TOOLS

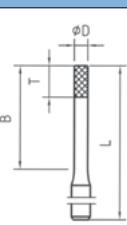

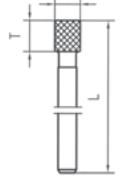

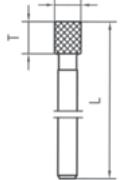

Info

Diprofil CBN Rotary Tools are made from carefully selected CBN (Cubic Boron Nitride), precisely bonded to obtain the best physical properties for added strength and resistance to wear. CBN tools are excellent for use on Tool Steels, Stainless Steels and Cast Iron.

Other shapes, dimensions and grit sizes available upon request.

DI-PRO POLISHING-KIT

FX-PK

The low weight of the tools makes them especially suitable for use with the low-vibrating Di-Pro Polishing-/Filing machines. Using the tools included in this kit ensures that potentially harmful vibrations are kept at a minimum level. Also reduces the need for adding and removing counterweight inserts as all the included tools are within the same weight span.

Kit includes the following items:

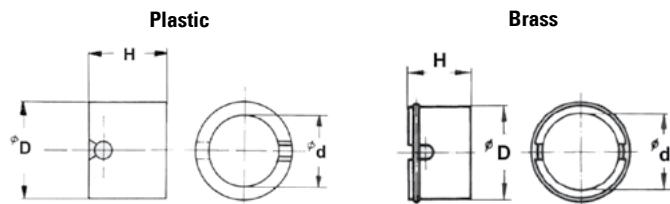

- 1 Toggle rod TR-3140
- 2 pcs of MS-15x13
- 1 pc of MS-33x13
- 2 pcs of FF-15x13
- 1 pc of FF-33x13
- 2 pcs of VF-15x13
- 1 pc of VF-33x13
- 1 pc of PS-129
- 1 pc of PS-309

TOOL HOLDERS**POLISHING STONES HOLDER****THBEA**

Tool holder with pencil grip for polishing stones or lapping ribs with maximum cross section area of 6x6 mm or Ø 6.0 mm.

REF
THBEA

POLISHING STONES HOLDER**THBEB**

Tool holder with pencil grip for polishing stones or lapping ribs with maximum cross section area of 4x4 mm.

REF
THBEB

POLISHING STONES HOLDER**THBEC**

Tool holder for stones with section of 13x6.
The closing with a screw grants a safe holding of the stone. Made of plastic.

REF
THBEC

SUPER STONE HOLDER

THFS-1

Tool-holder made of hardened steel for use together with ceramic fibre stones (Super stones) and lapping-/polishing tools with a thickness of 1 mm.

Shank Ø: 3,0 mm
Shank length: 18 mm
Total length: 31,5 mm
Width: 8 mm
Weight: 4,3 g

REF
THFS1

UNIVERSAL TOOL HOLDER

THPS-3

Tool-holder made of hardened steel for use together with polishing stones and lapping-/polishing tools with a thickness of 3 mm.

Shank Ø: 3,0 mm
Shank length: 18 mm
Total length: 31,5 mm
Width: 8 mm
Weight: 3,9 g

REF
THPS3

UNIVERSAL TOOL HOLDER

FMR/VH

Tool holder for Super Stones, Super Grinders and Polishing Stones to be used together with the Diprofil Polishing/Filing Machines. Stainless hardened shank Ø 3,0 mm. Shank length approx. 35 mm. Maximum tool thickness 6 mm.

REF
FMR/VH

TOOL HOLDER

QEA/3

Tool holder for use in the Diprofil Polishing/Filing Machines together with Polishing Stones and Lapping Ribs with maximum cross section area 13x13 mm or Ø 13 mm. Shank Ø 3,0 mm.

REF
QEA/3

TOOL HOLDERS

TOOL HOLDER

QEA/6

Tool holder for use in the Diprofil Polishing/Filing Machines together with Polishing Stones and Lapping Ribs with maximum cross section area 13x13 mm or Ø 13 mm. Shank Ø 6,0 mm.

REF

QEA/6

TOOL HOLDER

PLASTIC SHOES / TOOL HOLDERS

PS...

Plain plastic shoes for making your own special tools adapted to the specific application.

Dimension (mm)	Quantity	REF
12x9x2	10 pcs	PS129
30x9x2	10 pcs	PS309

TOGGLE ROD

TR-3140

Toggle rod for plastic shoes. Can easily be bent to an angle if required.

Shank: Ø 3,5 mm

Length: 140 mm

REF

TR3140

PRECISION STEEL FILES

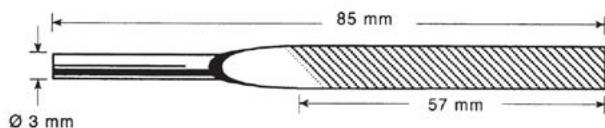

Info

Diprofil precision steel files for use in soft and semi-hard steel as well as other materials of low to medium hardness.

To avoid build-ups and resulting cracks it is recommended to always use a suitable cutting fluid or cutting oil (BL 10/WK 35) when applying polishing stones with grain size (320), 400, 600 or 900. In this way a blunting of the bond will be avoided and a constant resharpening of the cutting grains is guaranteed.

POLISHING STONES

PT 250 ...

**Features:**

- Total length = 150 mm
- Abrasive material: Aluminium Oxide
- Color: yellow
- A special very hard, sulphured stone for the machining of eroded surfaces.
- We recommend to apply cutting fluid or cutting oil when using fine grain stones, course grain stones can be used in a dry state.

Order example for first item (REF + Grain): PT2500313120

POLISHING STONES

PT 450 ...

**Features:**

- Total length = 150 mm
- Abrasive material: Aluminium Oxide
- Color: white
- Medium-hard stone for general polishing tasks on sectional steels.
- Machining of all grades of steel by hand and by filing machine.
- For coarse grain size, use in dry state.
- For fine grain size, use cutting fluid or diluent.
- Special stone for sectional or die steels.

Order example for first item (REF + Grain): PT4500306220

REF	Grain				Dimensions (mm)	
	220	320	400	600

- Abrasive material: Aluminium Oxide
- Color: white
- Medium hard, especially treated stone for the processing of Aluminium.
- Fast removal of material is achieved due to high cutting efficiency.
- It leaves no scratches or damage on the surface.
- The use of lapping- and polishing oil is recommended

Order example for first item (REF + Grain): PT4700306150

POLISHING STONES

POLISHING STONES

PT 550 ...

**Features:**

- Total length = 150 mm
- Abrasive material: Aluminium Oxide
- Color: dark brown
- Profile-stable special stone for the removal of the surface left by EDM.
- The high cutting capacity ensures fast removal of material.
- Suitable for machining by hand, with a filing machine and in particular with ultrasonic polishing machines.
- The use of an oil-free lubricant is recommended.

Order example for first item (REF + Grain): PT5500303220

REF	Grain									Dimensions (mm)	12

POLISHING STONES

PT 600 ...

**Features:**

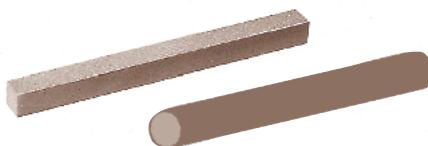

- Total length = 150 mm
- Abrasive material: Aluminium Oxide
- Color: dark brown
- A semi-hard adaptable stone for the removal of EDM surface.
- Because of its softer bonding it is in particular suitable for polishing by hand.
- The use of an oil-alcohol lubricant is recommended.

Order example for first item (REF + Grain): PT6000306100

REF	Grain									Dimensions (mm)	12
	100	120	150	180	220	280	320	400	600

PT6000613		•	•	•	•		•	•	•	6 x 13	

POLISHING STONES

PT 650 ...

Features:

- Total length = 150 mm
- Abrasive material: Aluminium Oxide
- Color: brown
- A semi-hard to soft stone, for hand polishing.
- For hand filing devices.
- Produces a soft finish and wears off in a very even way.
- Especially suitable for contoured surfaces due to ideal adaptability, for non-ferrous metals and chromium-nickel steels.

Order example for first item (REF + Grain): PT6500306100

REF	Grain									Dimensions (mm)	
	100	150	180	220	280	320	400	600	900

POLISHING STONES

PT 700 ...

Features:

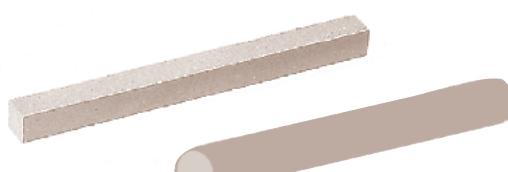

- Total length = 150 mm
- Abrasive material: Aluminium Oxide
- Color: cream-coloured/ivory white
- A hard porous stone for all polishing tasks.
- Treatment with a special oil prevents loading.
- The use of an oil-alcohol lubricant is recommended.

Order example for first item (REF + Grain): PT7000306120

REF + Grain	Grain						Dimensions (mm)

POLISHING STONES

PT 750 ...

Features:

- Total length = 150 mm
- Abrasive material: Aluminium Oxide, resin bonded
- Color: light brown
- A hard, resin-bonded stone with high strength against fracture, high shape consistency and cutting efficiency.
- Resin bonding causes a buffer effect between the grains.
- A better finish, considering the respective grain size in connection with the hard bonding.
- Hand operation and in hand filing devices, For removal of EDM-layers.

Order example for first item (REF + Grain): PT7500306120

POLISHING STONES

PT 880 ...

**Features:****Total length:** 150 mm**Abrasive material:** Silicon carbide**Color:** green

- Slightly harder bonding material than PT 850.
- Special stone for the removal of the residue left by ESM on cut and sectional steels.
- Particularly suitable for the treatment of hardened steels, punches, dies, steel castings and hot-working steels of HRC 47-63 and harder.
- The use of an oil-alcohol lubricant is recommended.

Order example for first item (REF + Grain): **PT8800404150**

POLISHING STONES

PT 900 ...

**Features:****Total length:** 150 mm**Abrasive material:** Levigated Alumina**Color:** white

- It is a very soft-bonded stone, which does not get blunt.
- A very uniform, soft polished section will be achieved.
- Further polishing with diamond paste of grain size 6 or 3 µm will result in high gloss finish.
- Advantageously used at the beginning of minor polishing repairs, operated by hand and using a suitable cutting oil.

CERAMIC STONES

NEW SUPER STONES

Info

**Application**

Ceramic stones are used for surface finishing of molds. They are also excellently applicable for grinding and polishing of alloyed and non-alloyed tool steels, cast iron, various alloy metals, copper, aluminium, silicon, magnetic materials, stones, plastics, etc.

Shape

Ceramic grinding stones are of either round or rectangular cross-section.

Lengths: 40 mm, 100 mm, 150 mm

Material

Ceramic stones are made of a new composite material comprised of long fine ceramic fibres and thermo-setting resin. The abrasive ceramic fibres always come out frontally.

Advantages

- excellent grinding performance
- long life
- highly stable properties
- nearly unbreakable (flexible)
- uniform surface finishing work
- easily profileable

Handling

The surface finishing work is done either manually, or with high-frequency grinding and filing handpieces, or with ultrasonic lap and polishing machines. In the field of high-frequency hand operated machines we recommend our power pack PA 480, PA 240 combined with LA 051 for round ceramic stones or connected to filing handpieces RE 35, RE 55.

Due to their high rigidity shorter dimension of ceramic stones are excellently suited for the ultrasonic surface finishing work. In this application machines like UF 2600 or UF 5600 are connected with handpiece UF 9700.

Using this equipment we recommend using ceramic stones at an angle of about 45° between workpiece surface and handpiece. The stones are fixed with adaptors in the handpiece.

Due to their highly stable properties and extremely long life ceramic stones are also used as carriers for diamond pastes when fine and ultra-fine polishing work is necessary for thin break-throughs, cavities and slits. In this case ceramic grinding stones are used parallel to the workpiece surface.

SUPER DIAMOND STONES

Info

Application

Super diamond stones SDS are used for surface finishing of moulds. They are also excellently applicable for grinding and polishing of alloyed and non-alloyed tool steels, cast iron, various alloy metals, copper, aluminium, silicon, magnetic materials, stones, plastics, etc.

Shape

SDS stones are of either round or rectangular cross-section.

Lengths: 50 mm, 100 mm

Material

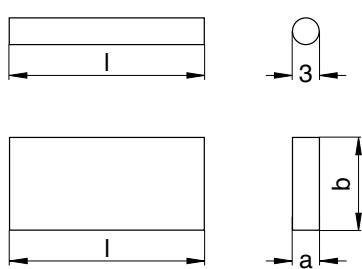

SDS stones are made of a new composite material comprised of long fine ceramic fibres. Diamond grains in different layers are bonded in epoxy resin.

Advantages

- excellent grinding performance
- long life
- highly stable properties
- nearly unbreakable (flexible)
- uniform surface finishing work
- easily profileable

SUPER DIAMOND STONES

CRYSTAL FIBER STONE CRISTONE®

JR...

Made with the highest quality, chemically produced crystal fibers. The crystalline structure of the crystal fibers offers high polishing efficiency and incredible bending strength. These are the perfect stones for detail polishing.

Prices upon request.

MOULD FINISH COMPARISON KIT

MOULD FINISH COMPARISON KIT

MFK 1200

Expanded version - 12 samples finished to SPI standards

- Eliminates errors or guesswork in achieving desired or specified finishes.
- Saves time by eliminating over-polishing.
- Provides a visual and numerical standard for specifying mold/part finishes.

REF

MFK1200

Finish Type	Description	Roughness average Micro-inches	Roughness average Micron	Comments
A1	Grade 3 diamond buff	0-1	0,025	
A2	Grade 6 diamond buff	1-2	0,025-0,05	
A3	Grade 15 diamond buff	2-3	0,05-0,076	<ul style="list-style-type: none"> • For mirror or optical finishes • Most time consuming • Steel grade important to results • (Steel DME 6 and 7 recommended)

ROTOR CUTTERS

ROTOR CUTTERS

ROTOR CUTTERS SHAPES

ROTOR CUTTERS

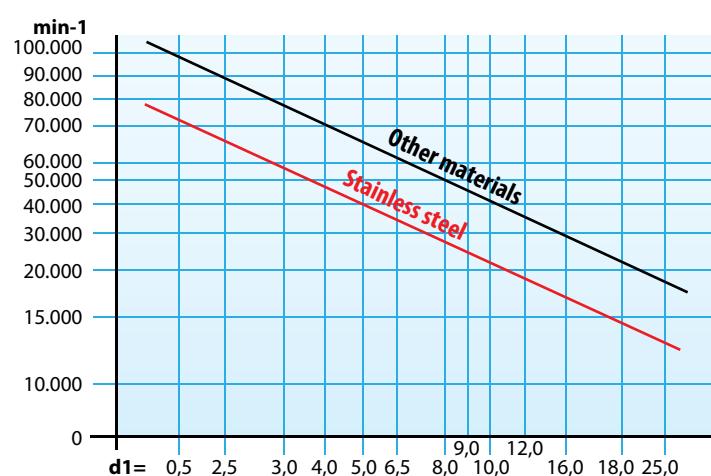

**Cross cut:**

very efficient stock removal on all ferrous metals including tempered and stainless steel, creates small chips, reduces vibration and gives excellent operator control.

**Standard cut:**

very efficient stock removal for a flawless finish.

SPEED RECOMMENDATION

ROTOR CUTTERS

FH ... / FH ... X**Features:**

- Material: Solid carbide grade K 10
- Vmax 30.000 min⁻¹
- Shank: steel
- Cross cut: add "X" to REF e.g. FH04X

HOIST RINGS - CE

SHM - SHMR

Pivots and swivels to compensate for pitch, roll and sway when lifting heavy or unbalanced loads.

High strength alloy steel with minimum tensile strength of 1,250 MPa (125 kg/mm²).

Certified heat treatment with 100% Magnaflux inspection.

Corrosion resistant plating.

Maximum operating temperature 200°C

Safety factor is 5 times the rated load in any direction.

standard tolerance: ±0,8 mm

E = the use of spacers between bushing flange and mounting surface is not recommended as this will reduce the safety load rating.

TL = recommended torque load +25% - 0.

P = rated

W = weight

DOUBLE SWIVEL SHACKLE

DSS-UP

Gradup

Specially Designed for Lifting and Turning Under Heavy Load
Large shackle for easy secure connection directly to crane hook
Compact and Ergonomic; requires less clearance
Tightens with allen wrench
Double articulation allows perfect alignment with the sling
Standard in Metric and Inch
Stainless Steel, adaptor and special thread options available as special order

TRIPLE SWIVEL SHACKLE

TSR

The hook does not scrape the tool when in traction at 90°

Three free articulations

Very low overhang designed for total safety

Perfectly symmetrical

Two ways of tightening: either by open-ended spanner, or by allen key for total quality

Improved stability with TSR C through centering section

High tensile

P = max load in Newton

SF = safety factor

KT = chain classification number

TL = recommended tightening torque in NewtonMetre

HOIST RING WITH ALLOY STEEL WASHER

8203 / 8204

- Rotates through 360° and pivots 90°
- Manufactured from alloy steel, quenched and tempered
- Tested in accordance with EN1677-1
- Certified by DGUV GS-OA 15-04
- Load rated parts are 100% magnaflux cracked detected
- Individual forged parts and cap screw are traceable to Test Certification
- Bolt threads are metric
- Proof tested to 2.5 times the WLL (Working Load Limit)
- Fatigue rated to 20,000 cycles at 1.5 times the WLL
- All YOKE Lifting points meet or exceed all the requirements of ASME B30.26
- Quick and simple assembly, just a tapped hole is required

ANCHOR POINT

8231 / 8232

- Rotates through 360° and pivots 90°
- Manufactured from alloy steel, quenched and tempered
- Tested in accordance with EN1677-1
- Certified by DGUV GS-OA 15-04
- Load rated parts are 100% magnaflux cracked detected
- Individual forged parts and cap screw are traceable to Test Certification
- Bolt threads are metric
- Proof tested to 2.5 times the WLL (Working Load Limit)
- Fatigue rated to 20,000 cycles at 1.5 times the WLL
- All YOKE Lifting points meet or exceed all the requirements of ASME B30.26
- Quick and simple assembly, just a tapped hole is required

QUICK CLAMPING SYSTEM

BAKRA CLAMPING SYSTEM

QUICK-ACTION CLAMPING SYSTEM

Bakra

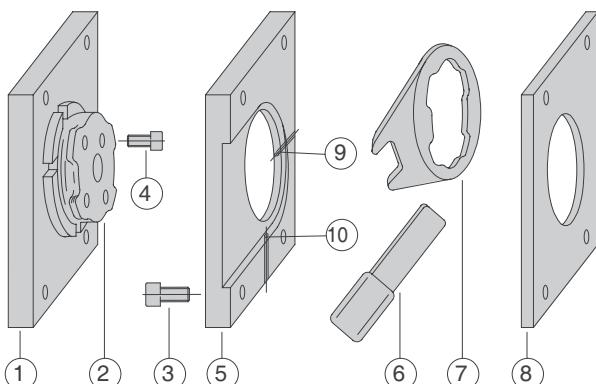

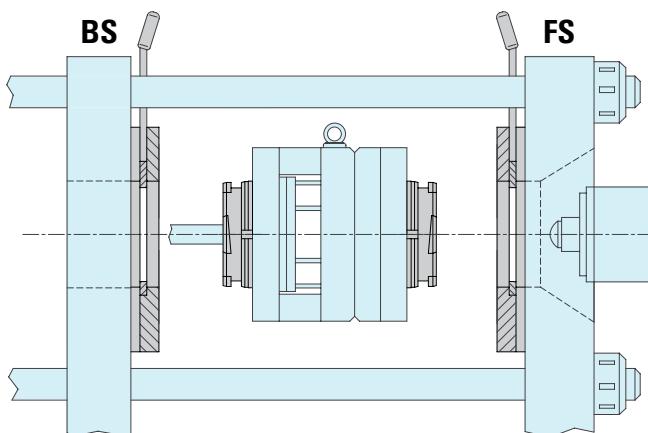

Maintenance-free, selflocking bayonet type quick-action clamping system suitable for mould weights up to 1000 kg.

Multi-purpose application suitable for all horizontal and vertical injection moulding machines with 2 or 4 tiebars, as well as barless design up to approx. 1800 kN.

Quick mould-change without requiring additional tools.

The system only requires interchanging locating rings on the mould. The set also includes compact adapter plates, to be mounted on the machine with thermal insulating sheets and cooling connectors when required.

Step-by-step refitting of moulds and machines possible.

Part list

1 Mould Clamping Plate	6 Wrench
2 Locating Ring	7 Locking Ring
3 SHC-screw	8 Thermal Insulating Sheet
4 SHC-screw	9 Retention Pin
5 Adapter Plate	10 Spring Loaded Set screw

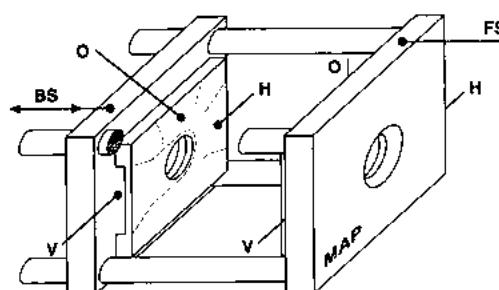

Cost-efficiency comparison for mould-change on a 1000 kN injection moulding machine.

	Clamp DIN 6316 and clamping screw	Bakra
No. of mould changes / year	150	150
No. of operators / change	2	1
Hours required / change	2 x (0,5 h (= 30 Min.))	0,083 h (= 5 Min.)
Purchase costs / 5-year depreciation	€ 400 (€ 80 / a)	€ 3800 (€ 760 / a)
Wages / year (€ 41 / h person)	€ 6150	€ 512,50
Machine down times / year (€ 51 / h)	€ 3825	€ 637,50
Costs / year	€ 10055	€ 1910
Savings / year		81%

The complete set contains the following items:

- 2 Adapter plates (BS/FS)
- 2 Locking rings (BS/FS)
- 1 Wrench
- 2 Locating rings (BS/FS)

Please specify type of moulding machine. Insulating sheets upon request.
Screws are included.

BS = moveable half

FS = fixed half

H = rear *

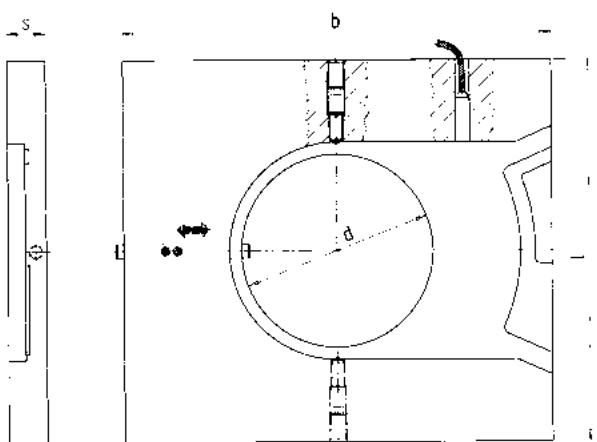

O = top *

V = front *

* Please specify side of locking system

BAKRA CLAMPING SYSTEM

MOUNTING INSTRUCTIONS

Info

Mount mould-specific locating rings ZF on the mould.
Open injection moulding machine, move back injection unit and machine ejector system.
Mount thermal insulating sheets WP (if available) onto the adapter plates AD using small SHC-screws.
Push back retention pins fixed to the adapter plates.
Insert centering device ZV into centering hole Dia. 110 mm or 125 mm of the adapter plates.
Position these subgroups according to the markings FS or BS onto the machine plates and mount them with SHC-screws. Don't screw in completely so that adjustment is still possible.
Align horizontal position of adapter plates according to sketch above and tighten screws.
Remove ZV, if necessary make thread in ZV.
In case mould set-up in horizontal direction is required, retention pins located in the adapter plates have to be pushed back.
For mould set-up into the moulding machine proceed as usual. With mould and machine in closed position, mould must be interlocked at the fixed and moveable half using wrench. Remove wrench from the adapter plate.

CAD reference point

QUICK ACTION EJECTOR RETURN COUPLINGS FOR PRESSES WITH HYDRAULIC EJECTION

Info AR**Economical**

- Shortens mould change-over times only one unit required per injection moulding machine

Universal

- Can be put into existing moulds to save time and money hydraulic return by means of fixed coupling pulsating ejection possible

Installation

- Move the ejector plate to the moulding position (mould closed).
- Move also the ejector cylinder rod to the fully retracted position. It is important to check by hand, that the rod is fully pushed back to the fully retracted position before measuring.
- Measure the distance between the coupling and the ejector cylinder rod.
- Extend the ejector cylinder rod with an extra knock-out rod of the measured length + 30 mm for AR-01 and 50 mm for AR-02.
- Move the mould ejector plates to the forward position (mould open).
- Lock both the extra knock-out rod and at the other end the quick coupling.
- Move the mould ejector plates back to the mould closed position and make the coupling between ejector plate and ejector cylinder rod. Make sure that the ejector plate and ejector cylinder rod are both in the mould closed position as soon as the coupling is made, if not, adjust.

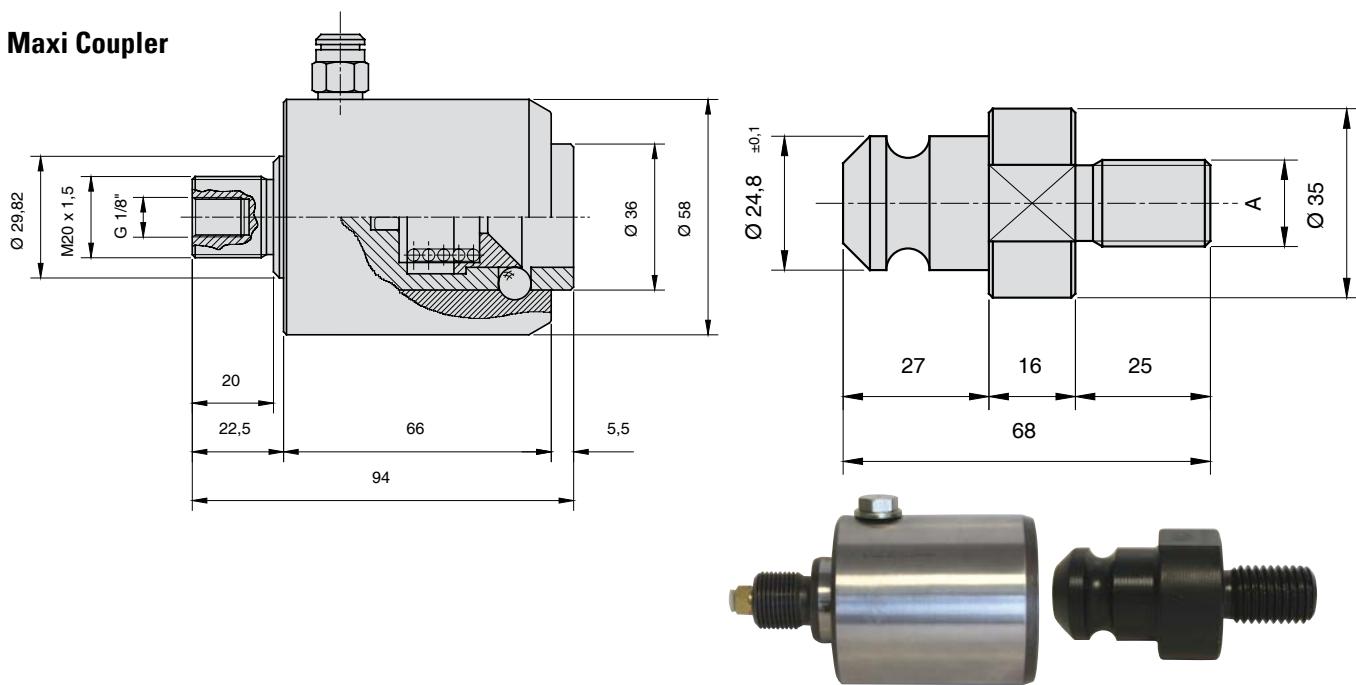

Do not use with quick mould change systems.

C 120 grease solvent
removes oil and grease
that they are easily removed.
With coarse residues
it might be convenient to spray a second time after wiping off.

C 120 grease solvent is particularly suitable for cleaning metal parts before pouring, gluing, varnishing or other working steps.

It is not suitable for the treatment of varnished surfaces,

rubber, and insulated parts.

Contains an acetone-free solvent mixture.
When used in large quantities, it may
react with the base metal and cause
corrosion. Therefore, it is recommended
to dilute the solvent with water and/or
alcohol. Excessive dilution may result in dry
solvent which may leave residues on
the workpiece.

Do not use on painted surfaces.

Painted surfaces may become

damaged by the solvent.

SPRAYS & CHEMICALS

RELEASE AGENTS

SILICONE FREE MOULD RELEASE AGENT

ECO-22

- Universally applicable silicone-free release agent
- Faultless part removal
- Best surface and protection of tools
- Checked by FABES Forschungs GMBH and approved towards the FDA regulations for production of parts related to food
- ECO-22 doesn't contain chlorinated or mineral oil additives
- Processing temperatures up to 180°C
- Active substances are from natural sources and none of the materials cause corrosion.
- Maintains lubricating effect
- Silicon free: Parts removed with mouldrelease agent may be printed, coated, metallized or bonded
- Filled with propellant gas (butanepropane)
- Excessively greasy parts can be lightly cleaned with water and detergent

REF	ml
EC022	12 x 400

SILICONE MOULD RELEASE AGENT

ECO-33

- Release agent for plastics and rubber
- Protects molds and maintains their bright finish
- Checked by FABES Forschungs GMBH and approved towards the FDA regulations for production of parts related to food
- Facilitates removal of molded parts and reduces waste percentage
- ECO-33 is guaranteed harmless to humans and nature and active substances are physiologically accepted
- Processing temperatures -40°C up to 250°C
- Maintains lubricating effect
- Filled with propellant gas (butane-propane)

REF	ml
EC033	12 x 400

SILICONE-FREE MOULDRELEASE AGENT

C 150

C 150 has excellent release effects and low consumption as a thin film guarantees best results. The ignition point of our mouldrelease agent C 150 means that even at maximum injection temperatures vapour bubbles or combustion residues cannot be formed. Any subsequent treatment of the injection moldings, like printing, lacquering, metallizing etc. is possible without removing the release agent. C 150 is non-aggressive and can easily be rinsed off. Our mouldrelease agent C 150 cannot be used for working with polycarbonates. Open bulks on request!

REF	ml
C150E	400

SILICONE RELEASE AGENT

C 155

This solvent free spray is recommended for the applications of natural and synthetic rubber, for elastomers and thermoplastics (not for silicone rubber). Temperature range to 180°C.

REF	ml
C155E	400

SILICONE-FREE RELEASE AGENT FOR POLYCARBONATES

C 158

This spray which is basing on special synthetic oils is recommended for polycarbonate injection moulding. Any subsequent treatment like lacquering, printing, metallizing and glueing is possible. Generally recognized as safe. C 158 is released for the BAYER AG product Makrolon. Temperature range to 150°C.

REF	ml
C158E	300

MOULD CLEANERS

MOULD CLEANER

C 126

C 126 is a special cleaner to remove resin and rubber residues, plastic deposits like PVC, PA, PI, PU, and acrylates. Applications. cleaning of plastic molds, injection and spinning nozzles, removal of adhesive residues, lacquer, and tar. The cleaning effect can be accelerated by heating to 80° C the parts which have to be treated.

The product is well biodegradable.

REF	ml
C126EN	500

GREASE SOLVENT

C 120

C 120 softens coatings of oil and grease so that they are easily removable. With heavy residues it might be necessary to spray for a second time after wiping off. Grease solvent C 120 is particularly suitable for cleaning metal parts before pouring in, glueing, varnishing or other work. It may also be used for removing marking colour C 130 but is not suitable for the treatment of varnished surfaces, rubber and insulating parts.

REF	ml
C120E	500

RUST-SOLVING OIL

C 110

C 110 loosens slightly rusted or tightly jammed screws, nuts or press joints and removes even thick films of rust on metal parts. Various additives ensure high lubricating effect and permanent rust protection. Eliminates squeaking.

REF	ml
C110EN	400

ANTI-CORROSION AGENT (CRYSTAL CLEAR)

C 100

C 100 provides an effective protective film on all metal parts to be protected from rust. The metal surfaces or parts are sprayed, thus protecting them permanently from oxidation. C 100 is crystal-clear and non-aggressive. It can be removed by any solvent as well as by petrol, benzene or grease solvent C 120.

REF	ml
C100E	400

TRANSPARENT ANTICORROSION AGENT

C 106

C 106 provides high protection of ground and polished standard parts, injection molds, etc., both during storage and for local transport. The thin waxlike film which is left after spraying on is solid in ageing, does not tear or resinate and is almost impervious to vapours, gasses, steam, and salts. Due to low viscosity inaccessible parts can reliably be moistened and protected. C 106 is chlorine-, nitrite-, and barium-free and is according to VW specification PV 52.02 easily removable even after a long period in stock.

REF	ml
C106EN	500

LUBRICANTS

SYNTHETIC LUBRICANT (SPRAY) / LUBRICATION PASTE

C 138 / C 139

C 138 and C 139 are used when glide elements, apparatus and machinery should not be contacted with mineral oil containing lubricants. Even under wet, moist conditions oxidation free, high purified raw materials ensure a permanent lubrication film.
The product is physiologically safe and without solid matter.
Temperature range: -30°C - +125°C

REF	ml
C138EN	500
C139E	150

SPECIAL HIGH-EFFICIENCY OIL WITH MOS2

C 160

C 160 provides excellent emergency running properties and is particularly suitable for highly stressed axial guides with close tolerances, e.g. die sets and similar equipment.
The addition of molybdenum reduces friction.

REF	ml
C160E	400

MULTI-PURPOSE LUBRICANT (SPRAY) / LUBRICATION PASTE

C 167 / C 168

C 167 and C 168 are heavy-duty lubricants without solid particles and with high pressure enduring properties. The lubricating film does not tear even under extreme conditions, thus the lubrication intervals are prolonged considerably. C 167 and C 168 is used for all moving parts in injection and diecasting molds in the field of metal and plastics processing, eg. ejector pins, coarse pitch axles, etc.
Temperature resistance to +180°C.

REF	ml
C167EN	500
C168E	150

MOULDRELEASING AND LUBRICATING AGENT WITH TEFLON

RZ 30

RZ 30 provides a waxlike release film being superior by its outstanding parting effect and very good lubricating properties. By spraying a surface (e.g. punching die) once or twice, it is possible to determine the guide clearance of a punch guide to be made with casting resin RZ 20. The melting point of the film is above 240°C. The sprayed-on mouldreleasing and lubricating agent is insoluble in water and organic solvents. RZ 30 provides clean lubrication and release without any contamination. TRI or C 120 grease solvent are used for removing the release and lubricating film. Spray at room temperature.

REF	ml
RZ30	400

CASTING COMPOUND FOR DIE MANUFACTURING

RZ 20

**Processing Instructions:**

- Stir up contents thoroughly before using
- Observe mixing ratio exactly by weight (5 – 100)
- Instructions for use (see overview)
- Close container carefully after using
- Use only where good ventilation is ensured. Avoid inhalation of vapours for longer periods of time and any contact with skin
- Wearing of plastic gloves will normally be necessary

Mix Ratio	Parts by Weight	
Resin	100	
Hardener	5	
Color	Blue	
Processing temperature	18 – 25 °C	
Viscosity at 25°C	15.000 mPas	
Pot Life at 25°C	45-80 Min	
Max Layer Thickness	30 mm	
Demoulding Time at RT	16 h	
After Cure : 7 days at RT or 14 hours at 60°C		
Density	ISO 1183	2 g/cm³
Hardness	ISO 868	85-90 Shore D
Coefficient of thermal expansion	ISO 11359	35 10⁻⁶ k⁻¹
Deflection temperature	ISO 75	65 – 70 °C
Compressive strength	ISO 604	140 Mpa
Compressive modulus	ISO 604	11.000 -11.500 Mpa
Flexural strength	ISO 178	110 Mpa
Linear Schrinkage	0.05 mm/m	
Abrasive resistance	Taber	22 mm³/100U
Storage (months)	12	

The compound consists of a black, medium viscosity epoxy resin and a clear liquid hardener.

Material characteristics:

1. high abrasion resistance
2. high compressive strength
3. high edge tear tolerance
4. minimum hardening shrinkage

A maximum casting thickness up to 25 mm can be realized in open moulds.

Applications:

Casting of piercing punch guides, embedding castings of punches, guide bushes and guide pillars. Parts which do not adhere with the casting compound must be treated with the mouldreleasing and lubricating agent RZ 30. The clearance of the punch guide can be influenced by the thickness of the mouldrelease agent which is sprayed on the surface. The clearance can also negatively be influenced by the greater thermal expansion coefficient of the plastics if fluctuations of temperature occur and so a determined value should not be exceeded. The proper value should vary between 2 and 6 mm - for the casting of hardened guide bushes with or without collar the clearance should be 2-10 mm. Dies which are furnished with casting compound punch guides should be heated up to room temperature before they are mounted in the press.

REF	Bulk
RZ20	1 x 500 g Resin
	1 x 25 g Hardener

PLASTIC STEEL

PS 220

Aluminium filled, liquid epoxy resin used for moulding duplicate parts and forms and injection moulding dies which are subject to extreme thermal stress. Temperature range up to 220°C. The material is nonrusting, antimagnetic and cures nearly without shrinking. The process of pre-curing as well as post-curing at 120°C produces highly-refractory castings.

REF	Bulk
PS220	1 x 450 g Resin
	1 x 50 g Hardener

PURIFYING AGENTS

FRESH START PURGING SOLUTIONS™

Fresh Start Purging Solutions™ are a patented, revolutionary, all-purpose purging compounds which are intended to cover the needs of the plastic processing industry. The MC2-HH™ & GP-HH Hybrid solutions are only two in a series of innovative and ground breaking purges designed for the removal of unwanted pigments, polymers and contaminates without leaving residue.

	Grades	GP-HH Hybrid	MC2-HH™
Injection Molding	Hot Runner Systems	•	•
	Cold Runner / Conventional	•	•
Other Processes	Blow Molding	•	•
	Compounding	•	•
Extrusion	Blown Film	•	•
	Cast Film	•	•
	Sheet	•	•
	Profile	•	•
Processing Temperatures	Low (°F)	350	350
	High (°F)	625	625
	Low (°C)	177	177
	High (°C)	329	329

Both formulas have been engineered to pass through hot runner systems with a min 0,254 mm or 254µm (microns) to completely clean the entire flow path. No need for soak time or to increase the heat over your normal processing temperatures.

MC2-HH™ and **GP-HH** Hybrid formulas encompass many capabilities all in one formula vs other compounds that are engineered for only one issue or process type:

1. High Heat
2. Hot Runner Cleaning
3. Clear Applications
4. Process Type

Why buy all these grades, manage inventory, and hope the correct grade is used for each application. Streamline your processes and consolidate into one purge that will satisfy all your needs.

WEEKENDER FEATURE

MC2-HH™ allows the purge to sit in the barrel over a shut-down period without degrading and seals the screw and barrel from moisture. This feature allows for easy start-ups by simply adding your process resin to the hopper and start running production parts.

FRESH START MECHANICAL PURGING COMPOUND

MC2-HH

MC2-HH™ is a proprietary solution for mechanical purge applications where hybrid / chemical purges are not preferred.

- Engineered thermoplastic purging solutions, formulated for the effective removal of resins, pigments and contaminants
- Designed for quick color changes
- Specifically formulated for cleaning manifolds, hot runners and other channels with tight clearance
- Safe, non-abrasive, non-hazardous purging solution developed around Generally Recognized As Safe (GRAS) ingredients under FDA 21 CFR
- Formulated for ease of use with no purging solution residue

REF	Description
MC2A55	MC2-A PE BASED 55LBS - MECHANICAL
MC2A1320	MC2-A PE BASED 1320LBS - MECHANICAL

The flexibility of Fresh Start Purging Compounds allows users to replace a number of formulas/grades typically used for a specific application. This feature could reduce inventory, purchasing costs, and accidental misuse.

Unlike other purging compounds, Fresh Start Purging Compounds require zero soak time for the chemical reactions to take place. Other purging formula brands require the temp to be raised to get the best performance out of the purge. Fresh Start MC2-HH™ and GP-HH Hybrid do not require or suggest raising the barrel temps.

FRESH START HYBRID PURGING COMPOUNDS

GP-HH

GP-HH Hybrid is a patent pending mechanical/chemical purging solution designed for the superior removal of the most difficult engineering resins from plastics processing equipment.

- Engineered thermoplastic purging solutions, formulated for the effective removal of even the most difficult resins, pigments and contaminants
- Designed for ease of use with no purging solution residue
- Ideal for quick color changeovers, particular liquid pigment dispersions and dyes
- Safe, non-abrasive, non-hazardous purging solution developed around Generally Recognized As Safe (GRAS) ingredients under FDA 21 CFR
- Not recommended for POM resins

REF	Description
GPA55	GP-A PE BASED 55LBS - HYBRID CHEMICAL/MECHANICAL
GPA1320	GP-A PE BASED 1320LBS - HYBRID CHEMICAL/MECHANICAL

APPLICATIONS & SPECIFICATIONS

Applications:	Injection- cold and hot runners, blow moulding Extrusion- profile, sheet, cast film, compounding, blow film
Temperature Range:	177° C - 329° C
Types of Resins:	All types
Minimum Clearance:	0,254mm or 254µm (microns)
Amount of Purge	Generally requiring 1 to 3 times the barrel capacity depending on the machine condition
Shelf-life	For best results use within 12 months. The purging compounds have been adjusted to address the challenge of exposure to moisture. (Keep bag sealed for maximum shelf life.)

Machine Clamping Force	Suggested Purge Quantity Guideline	
	Initial Purge	Regular Use
100 ton machine	2,268 kg	0,68 kg
200 ton machine	3,402 kg	1,134 kg
300 ton machine	4,536 kg	1,814 kg
400 ton machine	6,804 kg	2,495 kg
500 ton machine	8,165 kg	2,948 kg
600 ton machine	9,072 kg	3,629 kg
700 ton machine	11,34 kg	4,309 kg
800 ton machine	12,701 kg	4,763 kg
900 ton machine	14,515 kg	5,443 kg
1000 ton machine	15,876 kg	6,123 kg
1500 ton machine	18,144 kg	9,072 kg
2000 ton machine	20,412 kg	11,793 kg
2500 ton machine	22,68 kg	14,969 kg
3000 ton machine	29,484 kg	18,144 kg

	Process	Grades	
		GP-HH Hybrid	MC2-HH™
Injection Molding	Hot Runner Systems	•	•
	Cold Runner/Conventional	•	•
Other Processes	Blow Molding	•	•
	Compounding	•	•
Extrusion	Blown Film	•	•
	Cast Film	•	•
	Sheet	•	•
	Profile	•	•
Processing Temperature	Low (°C)	177	177
	High (°C)	329	329

Suggested Purge Quantity is a guideline for purging the barrel and screw only. Purging through the manifold/mold may require an additional 30 – 50% of the suggested amounts

PURIFYING AGENTS

PURIFYING AGENT

Kapusol

Prepare 25 kg of cleaning compound with this bottle of KAPUSOL!

Directions for use

Kapusol is a purging agent for cleaning the screw of injection and extruding machines. It can be used for colour and material changing's. Mix this bottle of KAPUSOL with 25 kg of pellets to be processed till a dry blend. Avoid wet lumps. KAPUSOL can be used at the normal temperature of most materials. Better result will be achieved if during the purge the temperature is 15% under normal.

Also for hand-use as a super-polishing product.

OTHERS

PLASTILIN

RZ 65

Rz 65 is used for the following applications: mould making, in the field of modelling, to close and to seal holes and recesses at dies when casting guides, etc.

Features: industry quality

Colour: grey-green

REF	Working set
RZ65	2 x 0,5 kg

MARKING COLOR (BLUE)

C130E

C 130 is suitable for small and large workpieces. It provides a homogeneous, adhering color film on the surface to be marked. The color dries on immediately and is easily removable by grease solvent C 120.

REF	ml
C130E	300

TIGHTNESS TEST SPRAY FOR FLUIDS

C220E

C 220 is a liquid, non-toxic, not inflammable, non-corrosive, biodegradable agent. It is used for tightness tests of pipes and facilities filled with inflammable gas (also for pipes with compressed air, oil, fuel and vapour).

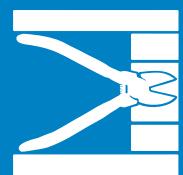

Instruction for use: Spray the surfaces to be tested. Haircracks and pores are now indicated by the developing of long time adhering bubbles or foam.

Caution: When testing oxygen facilities do not spray C 220 in the interior due to risk of inflammation.

POWER-UP GATE CUTTERS

FF7 - S7

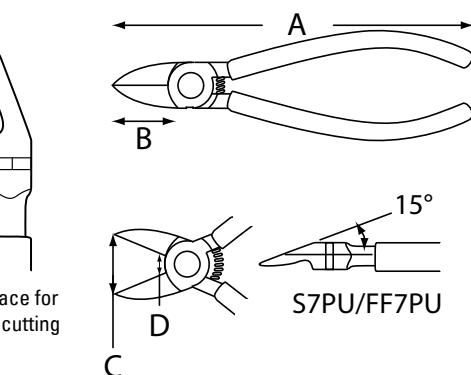

Comfortable cutting all day

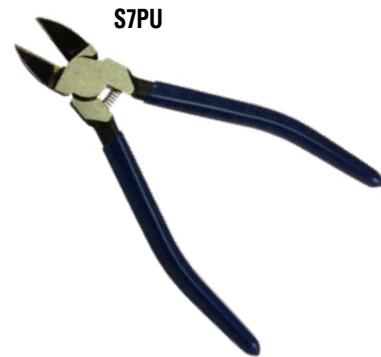

Power-up cutters are designed specifically for cutting heavy duty large sprues with reduced hand pressure.

The unique design and forging positions the hinge pivot point off-center to create a cam action which increases blade cutting pressure.

Simple mechanical leverage principles reduce the required hand force by up to 50% compared to conventional cutters. The new design of these cutters are ideal for repeat cutting of large, heavy sprues and particularly tough applications such as glass-filled resins.

DME PRO SERIES**FFB**

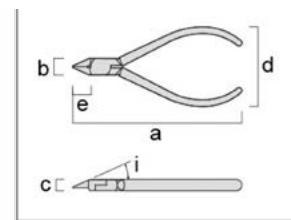

Mini Size Nippers for small sprue and gate cutting where less force is required. The unique hinge design and off set handles provide a cam action resulting in increased blade cutting pressure with less effort than traditional cutters. The new hinge design, highly polished blades and coil spring pack a 1,2,3 punch allowing for hours of cutting with less fatigue.

REF	Sprue Ø	A OAL	B Head Width	C Height	D Handle Width	E Blade length	F Angle of Blade	Spring	Cutting Blades	Blade Shape
FF4B	3	110	11	7.5	53	12,7	25	Yes	Double	Flat

DME PRO SERIES**TBSB**

Thin Blade Cutters are ideal due to their slicing action through the gate as apposed to a crush and cut which leaves an unattractive edge and requires more hand force. Try a thin blade cutter to see and feel the difference.

REF	Sprue Ø	A OAL	B Head Width	C Height	D Handle Width	E Blade length	F Angle of Blade	Spring	Cutting Blades	Blade Shape
TBS5B	3	126	13,5	7	52	13	25	Yes	Double	Round
TBS6PB	2	156	15,5	9	50	17,5	15	Yes	Double	Round

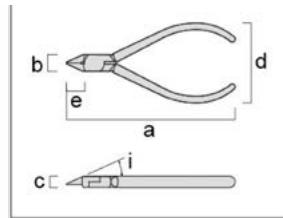

HAND CUTTERS

DME PRO SERIES

FFSB - SSB

The Single Blade Cutters are designed for cutting the hard plastic gates of engineered resins (POM, PA, PC, etc.). A single blade enables the user to "slice off" plastic without leaving flash on the cut section for a nice clean edge. The cutters also incorporate a coil spring for easy continuous cutting. Available in Round and Flat Face blades to fit your application.

REF	Sprue Ø mm	A OAL mm	B Head Width	C Height	D Handle Width	E Blade length	F Angle of Blade	Spring	Cutting Blades	Blade Shape
FF5SB	3	131	15,5	9	50	16	15	yes	Single	Flat

S5SB	3	131	15,5	9	50	16	15	yes	Single	Round
S6SB	5	154	17,5	10	50	20	15	yes	Single	Round

Double-edged type Single-edged type

Cut in the middle tend to leave burr

Smooth cut section

Less friction

More friction

Blades are dressed thinner to provide a sharper edge than standard nippers.

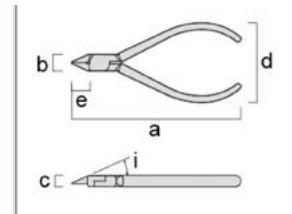

This produces less friction during the cut.

DME PRO SERIES

FFPB

Heavy Duty Cutters are designed specifically for cutting heavy duty large sprues with reduced hand pressure. The unique hinge design and forging positions the pivot point off-center to create a cam action which increases blade cutting pressure. Most suitable for large and glass filled gate cutting associated with injection molded plastic, plastic burrs and plastic model making. Available in 183 and 200 mm overall lengths.

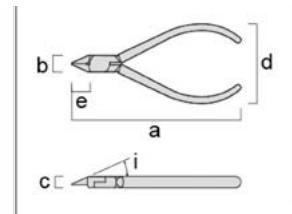

REF	Sprue Ø mm	A OAL mm	B Head Width	C Height	D Handle Width	E Blade length	F Angle of Blade	Spring	Cutting Blades	Blade Shape
FF7PB	6	183	22	10,5	49	23	15	no	Double	Flat
FF8PB	8	200	25	13	52	25	17	no	Double	Flat

DME PRO SERIES

FFB - SB - SPB

Force Enhancement Cutters are newly designed cutters ideal for repeat cutting of large, heavy sprues and particularly tough applications such as glass-filled resins. The forged high carbon steel blades are ground and polished to achieve very keen edge, resulting in a beautiful cut cross section. Coil springs are incorporated to continuous cutting. Sanitary antibacterial grip handles are applied to prolong use.

REF	Sprue Ø	A OAL	B Head Width	C Height	D Handle Width	E blade length	F Angle of Blade	Spring	Cutting Blades	Blade Shape

DME STANDARD & SPECIALIZED GATE CUTTERS

FFA - SA - GAA - GCX ...

Need a high quality cutter on a budget? DME's standard cutters provide high quality results at an economic price point. Offered in a wide range of lengths and blade styles the standard cutter is forged from high quality steel and ground to a sharp cross cut edge for long lasting usage. Have a hard to reach recessed gate? Try one of our specialized cutters designed to make the job easy.

HELICOL-COMBI® TOOL BALANCING SYSTEM

HEC...

**Applications:**

Balancing and supplying portable pneumatic tools.
On pre-assembly and assembly workstations.
On spot-welding and riveting stations.
On packaging lines: staplers, hoop binders, nailing heads.
2 functions of balancing and supplying the compressed air in one single integrated vertically suspended apparatus.
Fitted with a robust safety chain which prevents the spring from being strained, and a safe platform for suspension of larger air driven tools.

Installation:

Determine the attachment point for your balancing unit after having mounted the air driven tool on the free end. You will then obtain the effective height. Attach the balancing unit to a bracket. Helicol-Combi® can be attached in a number of ways: by direct thread, with quick-release connectors, flexible hose, or chain type suspension.

Construction:

Hose in special light protected blue color Polyamid 12.
Model HEC 50 is fitted with the SL type safety chain.

REMOVABLE NOZZLE TIPS

REMOVABLE NOZZLE TIPS

REMOVABLE TIP NOZZLE TIPS

GP - NRT - ABS

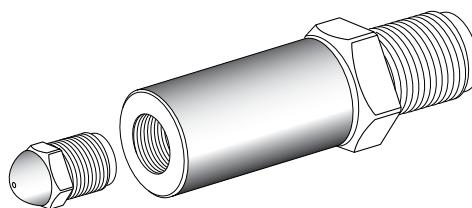

Standard nozzles are manufactured to fit your machine and accept regular $\frac{7}{8}$ "-14 thread replacement nozzle tips.

Mat.: Hardened Chromium-Vanadium Tungsten Tool Steel
Hardness: 48 / 52 RC

$\frac{7}{8}$ " - 14 thread

ORDERING EXAMPLE

Select:

1.
Tip Type

- GP - General Purpose
NRT - Nylon Reverse Taper
ABS - ABS Taper

2.
Length

- 1 - 38mm
2 - 70mm
3 - 95mm
4 - 125mm

3.
Radius

- 0 - Flat
5 - 12.5mm
6 - 15mm
7 - 19mm
8 - 35mm

4.
Orifice

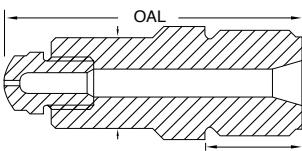

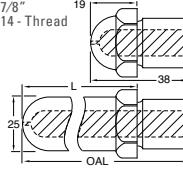

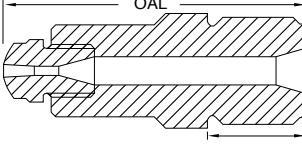

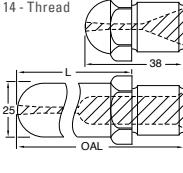

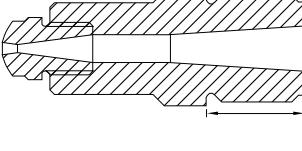

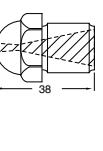

- | | |
|-----------|-----------|
| I - 1.5mm | M - 5mm |
| J - 2.5mm | N - 6mm |
| K - 3mm | O - 8mm |
| L - 4mm | P - 9.5mm |

e.g.: GP15K (GP / 1 / 5 / K)

In the above example, the part number for a General Purpose tip, 38mm long, with 12.5mm radius and 3mm orifice is GP15K. 1.5mm and 2.5mm orifice not available in NRT or ABS style tips.

TIPTYPE

Available in 3 internal styles, for use with

			L	OAL	Heater	REF
GP General purpose applications, a good, all-round flow path with smooth internal flow characteristics and minimal restriction to ensure minimum back-pressure.	 		19	38	-	GP1
			50	70	25x25	GP2
			75	95	25x50	GP3
			108	127	25x75	GP4
NRT Nylon Reverse taper, provides antidrool reverse taper in tip to 'freeze' slug (due to expansion) at tip, enabling drool to be minimized. For use with polyamides and other expansive materials.	 		19	38	-	NRT1
			50	70	25x25	NRT2
			75	95	25x50	NRT3
			108	127	25x75	NRT4
ABS ABS full taper, provides very smooth full taper design, both in the nozzle body, and continued through the tip. Minimises back pressure and ensures optimum performance, even with the most viscous materials. For use with ABS and other viscous hard-flow materials	 		19	38	-	ABS1

MICA INSULATED HEATER BANDS

GM.50

- Excellent thermal conductivity as heat transferer
- Long lifespan when correctly fitted
- Heating uniformity
- Easy installation
- Excellent dielectric strength

Technical data

- Max. Watt density 4 W/cm²
- Working temperature up to 350 °C
- Voltages 230V, 400V or other
- Sheath Stainless Steel AISI430
- Insulation material MICA
- Heating conductor Nickel-Chrome 80/20
- Temperature resistant pure nickel wires with glass-silk insulation and a steel mesh cover (400°C)

REF

Upon request

MICA FLAT HEATERS

GM.55

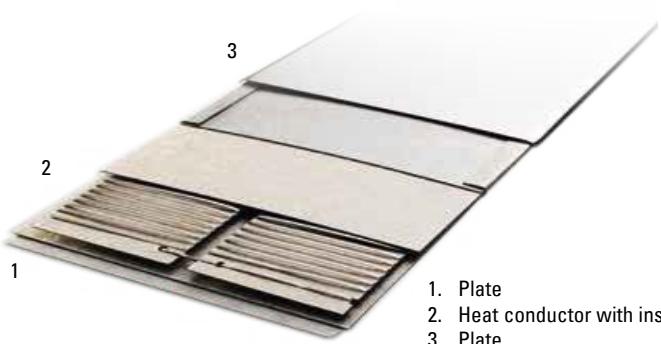

- Long lifespan when correctly fitted
- Heating uniformity
- Easy installation
- Excellent dielectric strength

Technical data

- Max. Watt density 4 W/cm²
- Working temperature up to 350 °C, for higher temp we use CERAMIC insulation
- Voltages 230V, 400V or other
- Sheath Stainless Steel AISI430
- Insulation material MICA
- Heating conductor Nickel-Chrome 80/20
- Temperature resistant pure nickel wires with glass-silk insulation and a steel mesh cover (400°C)

REF

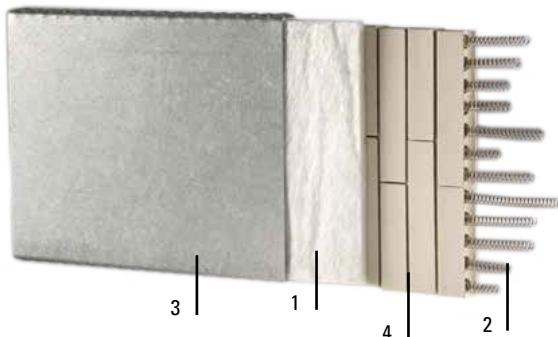

Upon request

CERAMIC HEATER BANDS

CERAMIC INSULATED HEATER BANDS

GM.60

- Excellent thermal conductivity as heat transfer
- High working temperature
- Very long life of the heater if it's mounted correctly
- Heating uniformity
- Easy installation
- Excellent dielectric strength

Technical data

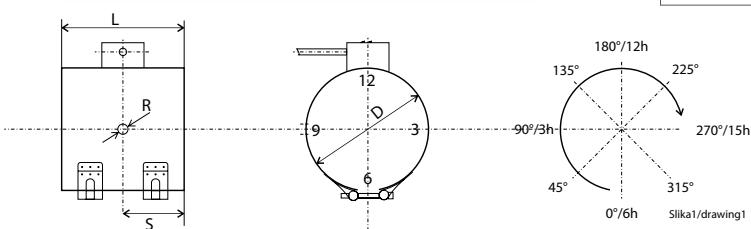

- Max. Watt density 8 W/cm²
- Working temperature up to 550 °C
- Voltages 230V, 400V or other
- Sheath Aluminized steel
- Insulation material Ceramic fibers
- Heating conductor Nickel-Chrome 80/20
- Temperature resistant pure nickel wires with glass-silk insulation and a steel mesh cover (400°C)
- Diameters from 60 mm, for heaters with diameter larger than 400 mm we recommend to use 2 segments
- Widths from min. 23 mm to max. 800 mm

REF

Upon request

INSULATION COVERINGS HEATSAVE

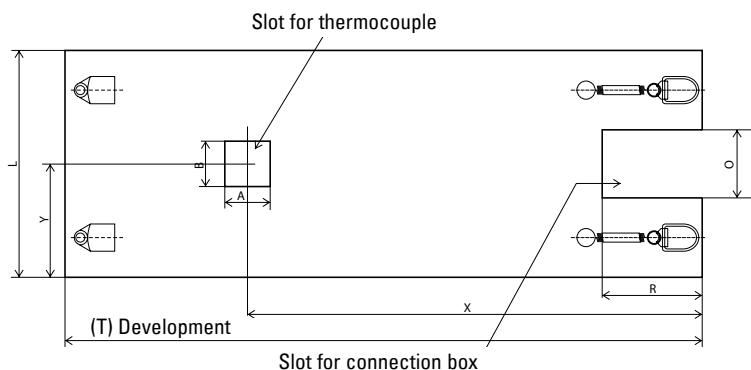

GM.56

**Advantages**

- HEATSAVE insulating covers reduce 20-40% energy consumption of the machine heaters
- Extended life of the heaters because of less on and off cycles
- Increased protection by reduction of the surface contact temperature by 60-75%
- It can always be retro-fitted rapid assembly and disassembly
- Amortisation time of HEATSAVE is less than 1 year
- Non-inflammable
- Reduction of the „start-up“ time
- Improvement of room temperature, because heaters radiate much less heat (Very important in summer months)
- Even temperature profile of the machine-cylinder
- Widths from min. 23 mm to max. 800 mm

REF

Upon request

Standard Leads are 1 metre Stainless Steel armour braid. Bands available to 90mm dia, 75mm width.

STRAP CLAMP BANDS

NB

- 1000mm fibreglass or stainless armour leads
- positive clamps action prevents cold spots
- High quality, high w/cm²
- All sizes listed are stocked
- 110 volt option available

HOPPER LOADER

MACHINE MOUNTED LOADER

MACHINE MOUNTED LOADER

TAL300C

Full featured electronic touch-pad control.

Conveying Capacity 400kg/hr.

The BCE4 series of hopper loaders are designed to be cost-effective, high quality units which help eliminate contamination and manual handling and are particularly suited to the transportation of free-flowing virgin granules.

The integral single-phase suction motor creates a flow of air which carries granules through the material line for the (operator) selected time. The granules are then discharged directly into the processing machine hopper and the cycle is repeated until both the machine hopper and hopper loader bowl are full.

All units have microprocessor control allowing digital setting and display of loading time, loading function and mode selection. Furthermore, operational fault diagnosis is provided as standard.

Cleaning of the filter can be carried out away from the machine by removing the complete suction head.

Features include:

- Robust stainless steel bowl.
- Integral filter.
- Adjustable loading time.
- Flow-path indicator lamps.
- Audible low level alarm.
- Stainless steel suction probe.

Specifications

Conveying Capacity: 400kg/hr

Conveying Height: 4m

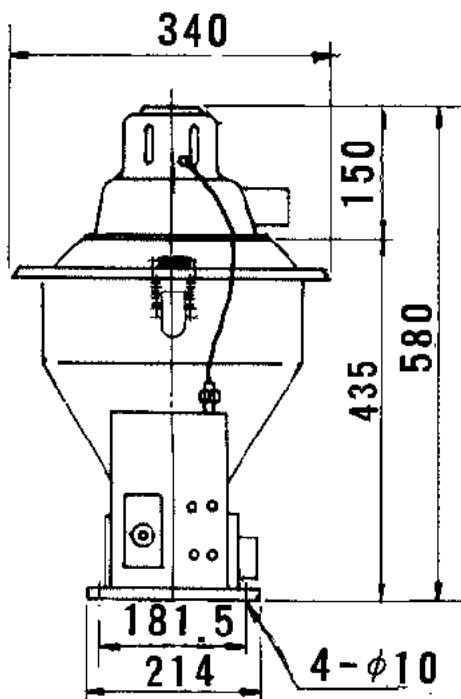

Conveying Length: 7.5m

Motor Rating: 800w

Weight: 16kg

Power: 240V, 1ph.

GENERAL CONDITIONS OF SALE DME EUROPE

The contract is validly entered into and the order is accepted after written confirmation by seller. These sales conditions apply to the exclusion of any other terms or conditions, unless expressly accepted in writing beforehand by the vendor.

Seller has 30 (thirty) days since the reception of the order to accept or to refuse it. During this period, buyer shall not withdraw his order.

Absence of any written confirmation of the order shall only be interpreted as being an implicit acceptance in case of performance of the order by seller.

2. PAYMENT

Unless otherwise agreed in writing, invoices are payable in the stated currency within 30 (thirty) days after invoice date to the bank designated by seller. Transfer charges are for account of buyer.

If buyer does not pay within this term, seller shall automatically have ipso jure and without any prior formal notice, the right to charge legal interest plus 2 % from due date of the invoice. Moreover, in case of late payment, a fixed indemnity corresponding to 10 % of the payable amount shall automatically be due from the first day following the due date, without prejudice to seller's right to prove higher damage and ask for corresponding indemnity. Should payment be in foreign currency, seller has the right to adapt the foreign currency in case of depreciation of this foreign currency in regard of the euro.

Should payment of the delivered goods be in instalments, the non-payment of one of the instalments gives seller the right to terminate the contract. The payments, which were done until then, shall remain property of seller as indemnity, without prejudice to the right to claim further damages or to the right to require the performance of the contract.

Payment of advance shall not give buyer the right to terminate the contract upon reimbursement of the paid advance. If payment is done by bill of exchange or check, payment is deemed satisfied only when the bill of exchange or the check is honoured.

Place of payment is always Mechelen even if payment is done with bill of exchange.

3. RETENTION OF TITLE

Delivered goods remain property of seller until full payment has been received by seller. The sale of an unpaid item by buyer to a third party results in automatic assignment of the debt due by the third party to buyer, inclusively the retention of title, to seller. Seller has then the authority to take any necessary means in order to validly assign towards the third party. Seller may retake unpaid goods at any time and he may inform any client and/or any subcontractor of buyer about the fact that seller is and remains the only owner of the concerned goods until full payment.

The purchaser undertakes to carefully keep the goods that have not been paid for, and undertakes not to pledge them or use them in any other way as a guarantee or security. The purchaser shall inform third parties who may apply any security rights over his assets (such as, but not limited to, the lessor of the premises occupied by the purchaser) that the products are and shall remain the property of the vendor until full payment of all sums owed by the purchaser to the vendor, and in the event of an attachment

or other measures taken by third parties that apply to products for which full payment has not yet been made the purchaser undertakes to immediately inform the vendor of this to enable him to apply his rights.

4. RISKS

Notwithstanding the preceding provisions, the risk transfers to buyer as soon as he has the goods at his disposal.

5. DISPATCHING OF INSIGNIFICANT VALUE

Each dispatch of less than € 60 will be increased with costs of payments and may, at sellers option, be sent cash on delivery (COD).

6. PRICE OFFERS AND PRICE LISTS

Price offers and price lists are without obligation and are subject to change without any previous notice.

Any information released by seller is delivered in good faith and seller shall not be responsible for the choice of material and goods.

7. PRICE AND DISPATCHING

All prices are ex works. Transportation, duties and taxes for account of buyer, unless seller's previous and express written specification to the contrary. Seller shall send goods by the fastest and most economic way at the risks of buyer. Goods may be insured by seller at buyer's option, the insurance premiums are for buyer. Seller is not responsible for the choice of packing.

8. DELIVERY

Date of delivery is the date when the goods are ready for inspection at the indicated place. Place of origin is Niel, Belgium, or any other place indicated by seller. Seller is not responsible for any late delivery, except those delays due to his own fault or gross negligence.

9. RETURNING OF GOODS

No goods can be returned without seller's previous, express and written consent. If buyer commits an error in ordering, the retaking of goods is possible only for inventory standard items. Goods must be returned within 15 (fifteen) days after invoice date and all goods must be in original conditions, all costs of transport are for buyer, as well as insurance and repacking costs. Special-order goods, marked or used items are non-returnable.

10. DEFECTS

Seller warrants defects in material and/or workmanship. Warranty is limited to the replacement or repair, at seller's option, of any merchandise found defective during 1 month. This warranty does not include defects due to buyer's fault or to abnormal use, bad maintenance, imperfect installation, buyer's inadequate repair, unforeseeable circumstances or in case changes were brought to material without previous and express written approval of seller.

Notice of conspicuous defects must be given to seller by registered letter sent within 10 (ten) working days following date of delivery.

Notice of hidden defects must be given to seller by registered letter within 10 (ten) working days after date of discovery, and in any case, within a 10-month term following date of delivery.

Seller is not responsible for any damage and in particular salary and material costs, losses, loss of profit or loss of a chance incurred by buyer, unless it is demonstrated that defect is due to seller's gross or intentional fault. If seller is responsible for defect, seller has the right either to terminate the contract and to pay back all the invoiced prices or to replace the delivered product within a reasonable term. If goods for repair must be transported, costs and risks of this transport are for buyer.

In case seller is responsible for any damage, this will be limited to the foreseeable damage with a maximum amount corresponding to the amount of the product's invoiced price.

Should a third party lodge a claim against seller to obtain payment of an indemnity for a damage for which seller is not responsible in accordance with the present conditions or for a higher amount than the one seller is responsible for, buyer will warrant seller against those claims.

11. DESCRIPTION

Only product descriptions used in seller's latest literature and correspondence with buyer, are binding for description of goods.

Buyer is responsible for using items in conformity with all regulations, including but not limited to, the safety regulations in force at the place of use.

12. SPECIFIC ORDERS

For the performance of a special work, the project signed by buyer is binding to the extent it has been accepted by seller.

For the performance of such work, special conditions may be required. In case of any inconsistency between general conditions and special conditions, the special conditions shall apply. Should special conditions be unclear, they shall be interpreted in light of the general conditions.

13. ACT OF GOD

Seller shall not pay any damage for non-performance or late performance of his undertakings due to Act of God. Act of God includes in particular and without being limited thereto, strike, lock-out, and the non-performance by seller's suppliers of their undertakings.

14. VALIDITY AND INDIVIDUAL CLAUSES

If one or more provisions of these present general conditions are held to be invalid, the remaining provisions will continue to be valid and enforceable, and parties will agree upon other provisions having an economic effect that corresponds closest to the economic effect of the invalid provision(s).

15. WAIVER

In case seller does not exercise one of his rights in accordance with the present conditions, this shall not be interpreted as a waiver of these rights.

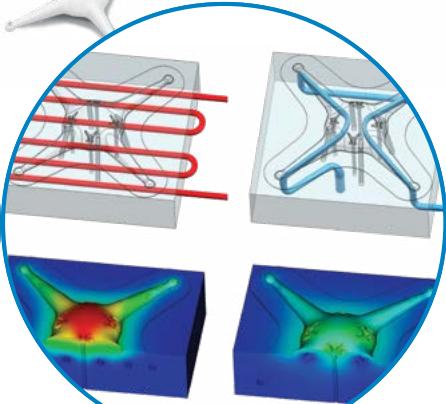

16. APPLICABLE LAW – COMPETENT COURTS

This sales contract will be governed by Belgian law. The competent court is the Commercial Court of Mechelen, without prejudice to seller's right to introduce the case before another competent court.
